Summit **Could Be** Extended

Gorbachev Would Stay for Gains on Strategic Arms

The Associated Press MOSCOW - Mikhail S. Gorbachev will stay an extra day or two in Washington if success is at hand on an accord to cut strategic ouclear missiles, a Soviet adviser on U.S. affairs said Thursday.

that President Ronald Reagan and Mr. Gorbachev would make long strides toward reduction of strategic, or long-range, nuclear missiles. Asked why Mr. Gorbachev was making only a three-day visit to the

United States, Mr. Arbatov replied: "Comrade Gorbachev is not able to engage in tourist programs, However, should it turn out that one more day would be needed to reach agreement on 50 percent cuts" in strategic weapons "I would risk to forecast that comrade Gorbachev will stay there a day or two longer to complete that agree-

would stop over in Britain for talks en route to Washington.

Mrs. Thatcher, announcing the Gorbachev visit to cheers from leg-islators in the House of Commons, said be would be in Britain for "a. few hours" but she hoped he would accept an invitation for a longer

The United States and the Soviet Union have expressed support for a 50 percent reduction in long-range missiles, but have been unable to resolve differences over Mr. Reagan's space-based missile defense system, known officially as the

Strategic Defense Initiative. . Mr. Gorbachey plans to arrive in the U.S. capital on Dec. 7 for a three-day meeting with Mr. Reagan. They are to use their third meeting to sign a treaty eliminating e ground-based Lance missues both oatioos' medium- and sborter-range missiles, and to talk about future reductions in longrange weapons. The Soviets claim that space-based missile defenses violate the 1972 Anti-Ballistic Missile Treaty, while U.S. negotiators contend a broader interpretation of the agreement allows research into such a defensive system. The issue proved insurmount-able during the last U.S. Soviet summit meeting, in Reykjavik in October 1986, and promises to be bound for Hong Kong, Tokyo and Taipei. It announced delays in othone of the most contentious problems facing the leaders next month. Mr. Arbatov, a member of the Communist Party Central Committee, and Major General Geli V. Batenin, a Central Committee adviser on military policy, portrayed the treaty as the product of a ocw phase of relations between the two oations, although Mr. Arbatov stopped short of calling the rela-

In Luxor, a New Age Is Wearing Out the Glories of Antiquity

By Alan Cowell New York Times Service

And the second second second second

Page 2

LUXOR, Egypt — This ancient city beside a placid Nile, long used to tending its plundered antiquity, has become embroiled in a modest effort to build a little modernity, too, so as to beautify the visage it presents to visitors when the sightseeing is done.

Yet those concerned with preserving the tombs and the temples that draw hundreds of thousands of tourists to Luxor each year say apprehension persists that profound shifts in the environment, and the effect of the tourists themselves, are gradually destroying the same monuments that the visitors come to visit.

"This generation of scholars and tourists may well be the last to see the sites here as they are," said Lenny Bell, of the Chicago House archaeological center in Luxor.

Comparing the effect of environmental change on the monuments to the impact of human encroachment on the animal world, he said Luxor's modern realities were "destroying a whole species of mankind's heritage as well.

Luxor and the Nile Valley are held to contain the world's biggest concentration of ancient sites, chroni-cling civilizations that flourished thousands of years 880

The testaments to its wealth and power remain in the great spread of the Karnak and Luxor temples, in what is called the City of the Living on the Nile's east bank, and in the myriad tombs and shrines that stipple the barren valleys of the City of the Dead on the west

But according to Egyptologists, including Mr. Bell, the filling of the Aswan High Dam, 140 miles up-stream from Luxor, has changed things, starting an ecological chain.

The dam has stemmed the annual floods that swelled the Nile with waters from East Africa. That in turn has permitted year-round cultivation by irriga-tion, which has moistened air that dried when the old floods were over. Sustained agriculture, moreover, has weakened the alluvia that once sustained the harvests, so more fertilizer is needed, and the levels of underground water have risen and its salinity has increased. At the end of this chain, the limestone of the tombs

and the sandstone of the monuments have drawn op the waters, so that sait crystals form, eroding surface inscriptions and murals.

At the same time the tourists like to touch the ancient surfaces - some even carved their names in them, Mr. Bell said - and their body heat in the enclosed tombs added further to the moisture that was unknown in the millennia before widespread exploration, preservation and often plunder began 150 years

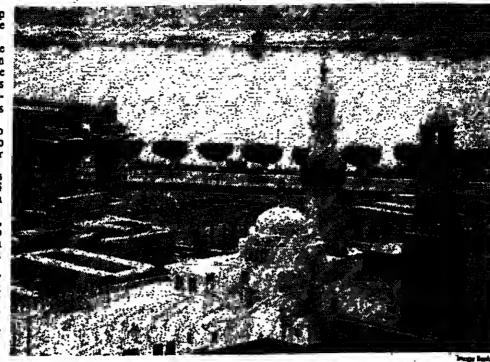

ago. "Eventually," Mr. Bell said, "they are just going to have to take the best preserved parts and put them into climate-controlled museums, separated from the water table

To illustrate his point, he showed two photographs depicting the same piece of inscribed stone in 1935 and 1985. In the older print, it was deeply etched with hieroglyphics. In the second, it was completely bald. Such is the crisis in the tombs of Nakht and Menna, dating from 1450 B.C., that they have been closed to visitors while a Scandinavian team experiments with the installation of a glass tunnel to shield the ancient inside from the modern outside, including the tourists. The collision between the very old and the relatively new is not limited to the antiquities of this place. Yet in Luxor, in a fertile sliver of valley hemmed by Egypt's endless deserts, the tangle of conflicting urges ns particularly acute.

In 1986, for instance, 466,103 tourists were officially registered as staying in the town's 9,000 hotel rooms or aboard the high-priced ferries that offer luxurious accommodations on the Nile, according to the tourism director, Abu el-Maged Omar. Some say that the figure is low and that as many as one million people visit Luxor each year, bearing hard currency that the country needs.

The municipality, moreover, is out to lure more of them in a way that seeks to free Luxor's relatively modern stores and streets and hotels from the city's lingering image as a tawdry backdrop to ancient magnificence

The World Bank has earmarked a reported \$50 million to renovate Luxor. Part of that, said the mayor, General Mohammed Zakaria Fadl, is being spent on a new Nile-side highway and walkway that has brought Chinese engineers to town.

A view of Luxor, where a chain of events is now threatening the tombs and monuments.

There is, he said, a new electric power generation airport opened this year, to help the tourists come and

plant and a new sewerage system, although no new go-system for humans has a chance of countering the noisome ubiquity of the city's 1,200 horse-drawn cabs for instance, receives only a fraction of the revenues that, in shifts, employ more than 2,000 horses.

WORLD BRIEFS

EC Fails at Curbing Farm Subsidies

BRUSSELS (Reufers) — European Community ministers abandoned efforts Thursday to curb farm subsidies, raising the threat of a painful squeeze on other spending if participants in next week's EC summit meeting also fail to resolve the bloc's financial crisis.

Diplomats said the deadlock among the 12 agriculture ministers after another all-night session made agreement at the Dec. 4-5 meeting in

Copenhagen even less likely. The EC would then have to move to an emergency financing system that would penalize everyone except its 12 million farmers and would cause special bardship in the poorest member states — Spain, Portugal, Ireland and Greece. The emergency financing system would restrict the EC to conclude construction that the same amount next year as in 1987. EC to spending exactly the same amount next year as in 1987.

India's Sri Lanka Force Put at 40,000

NEW DELHI (Reuters) - India has the equivalent of more than two infantry divisions in Sri Lanka battling to impose a peace pact on Tamil guerrillas, Defense Minister K.C. Pant said Thursday. The figure was

nearly double earlier estimates. Mr. Pant gave no actual figure for troop strength but Western diplo-mats estimated that, including paramilitary policemen, the force totaled up to 40,000 men, of whom 20,000 to 25,000 were front-line army troops. Previous estimates put the force at 20,000.

rrevious estimates put the force at 20,000. "Over two infantry divisions' worth of troops, along with 162 person-nel of the air force and 114 of the navy, have been deployed," Mr. Pant, said, responding to a question in Parliament. It was India's first official statement on troop strength in Sri Lanka. Mr. Pant said 262 Iodian soldiers had been killed, 927 were wounded and 15 were missing in seven weeks of lighting, while 954 Tamil rebels had been killed.

Game 17 of Chess Match Is Drawn

SEVILLE, Spain (Reuters) - The resumed 17th game of the world chess championship was drawn Thursday. The titleholder, Garri Kasparoy, and the challenger, Anatoli Karpov, are tied in the 24-game match with 8.5 points apiece.

5 More Die in Haiti Election Violence

PORT-AU-PRINCE, Haiti (Combined Dispatches) - Five more persons were reported killed overnight in violence related to the elections

scheduled for Sunday after the government declared that neighborhood vigilante action "will not be tolerated." Radio Haiti-Inter said Thursday that arsonists burned down the headquarters of a presidential candidate, Marc Bazin, in Gonaïves, the country's third-largest city. The arsonists also tried but failed to burn

down Radio Independence, according to the report. The slayings brought to 11 the number of people reported killed since Tnesday night and to 19 since the weekend in pre-election violence that has gopped Port-an-Prince. On Sunday, Haitians will vote for a president and a two-chamber National Assembly in the first elections since Jean-Claude Duvalier fled to exile in France in February 1986. The elections will be the country's first free vote in 30 years. (AP. AFP)

For the Record

Obligatory AIDS virus testing was rejected unanimously on Thursd. 2002 by the foreign ministers of the 21 nations of the Council of Europe. In 1972 meeting in Strasbourg, they reled out testing either for populations asson, whole or among specific groups within populations. The ministers agence on a common policy that rejects discrimination against AIDS sufferers counter form inter form only and schools or confine carriers, such as exclusion from jobs, housing and schools, or confinement and restriction of movement. Opposition Leads In Suriname Vote

The Associated Press

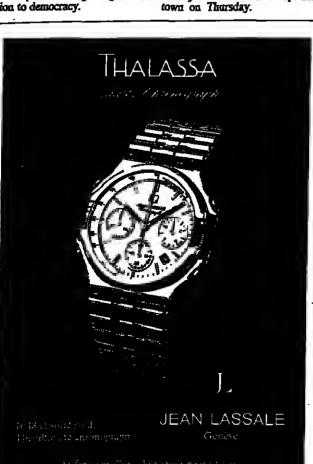

PARAMARIBO, Suriname - A three-party opposition coalition appeared Thursday to be headed for a landslide national election victory over the party backed by the military leader. Commander Desi Bouterse.

The election Wednesday was the first nationwide balloting in Suriname since the 1980 coup by Commander Bouterse. Local news media said unofficial results indicated that the Front for Democracy and Development appeared to have won 38 to 40 of the 51 seats in the Atlanta. National Assembly.

Commander Bouterse and the 2,000-man army were not expected to yield full political power, howev-er. A constitution approved in a referendum in September gives the army responsibility for promoting

TRAVEL UPDATE

Cars were swamped in Rome's streets Thursday by severe flooding, and a state of alert was declared in several areas.

Heavy Rain Causes Flooding in Rome

ROME (AP) — Heavy rains pounded Rome on Thursday, temporarily shutting the Leonardo da Vinci airport, causing the Tiber to swell to alarming levels and trapping children in a flooded schoolhouse. The fire department said it received close to 2,000 calls for emergency

help. It mobilized 400 firefighters and 100 vehicles to rescue citizens in trouble, including 100 elementary school children stranded in a flooded schoolhouse and a 17-year-old boy injured by a lightning bolt.

Because of early snow, Swiss ski resorts said they were opening lifts and trails this weekend - two weeks before the usual mid-December start of the winter season. (UPI)

Flights in the Los Angeles area were backed up for hours Wednesday after a bomb scare on one passenger plane, smoke in the cockpit of another and a software failure of an air control computer. Airports affected were Los Angeles International, Burbank and Ontario. (UPI)

Nine unions of the French domestic arline, Air Inter, called on ground and flying employees Thursday to stage a 24-hour walkout Monday. A communique said the unions wanted to protest a Paris court's ban last week on a planned strike at Air Inter. (AFP)

Can 20 Panting Hamsters Be Wrong? They've Run Across Jet Lag Solution

New York Times Service

NEW YORK — Humans suffering from jet lag, their nervous systems battered by the unreasonable sunlight of a new time zone, may want to consider the recent experience of 20 hamsters at the University of Toronto. A single three-hour round of exercise running on a wheel in a cage — allowed the hamsters to adjust to a severe case of jet lag surprisingly fast, within a day and a half. Hamsters left alone took eight days to recover. As long-distance air travelers know too well, science has failed so

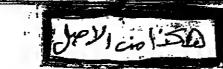

far to come to grips with the sudden resetting of biological clocks. People seeing the sun rise or set when their bodies feel it is midnight or noon tend to feel some malaise.

Various drugs and diets have been tried, with questionable success, Biologists know that exposure to light can help reset the body's clock. The idea that exercise could speed the adjustment is newer, according to Nicholas Mrosovsky and Peggy A. Salmon of the University of Toronto, who report their findings in the journal Nature. The experiment was relatively simple. Artificial light kept 20 hamsters on a daily rhythm. Then the schedule was moved forward 8

hours, as though the hamsters had taken a long flight east - as in a New York-Paris flight. Half the hamsters were kept active when the new schedule called for it. The others mostly skept.

Precisely why exercise worked remains to be seen.

We are not quite sure whether it is the running itself, or that the animal is kept awake when it shouldn't be awake, or the excitement," Dr. Mrosovsky said. "Now what we should do is to vary things, the amount of exercise and so on "

Although a search for collective minister has stressed continuity. goals often appears both vague and not dramatie departures.

Most important, perhaps, Mr. Takeshita has hinted strongly that Mr. Nakasone will play a substanual if unofficial role in guiding the nation in matters of foreign policy. Are these valid reassurances,

diplomats and local observers ask. or are they tacit acknowledgements that the Nakasone legacy is in danger of being lost?

For much of Mr. Nakasooe's term, critics charged that too many practical issues were left unattended - that his five-year administration consisted more of images and symbols than of substance.

More effectively than his predecessor, many Japanese observers were quick to assert, Mr. Takeshita will be able to implement needed reforms in such areas as taxes, agricultural and trade policies, land use and bureaucratic administration.

Changes in these areas are iotegral to Japan's broader effort in "internationalize." Among other things, they will help develop the country's ability in consume more of the world's goods and thus reduce a global trade surplus that In the post-Nakasone era, acmany view as excessive to the point

of irresponsibility. But for Japan's allies and Mr. Nakasone's domestic supporters, Mr. Nakasone's political postures were important in themselves. Through them, he was able to ask Mr. Nakasone himself seemed to for the first time how Japan will replace a preoccupation with its own well-being and a view of the world as little more than a market.

Mr. Takeshita's challenge is not so much to resolve his redecessor's "Nakasone showed that a stronso finite to resolve its redecessor's concerns, analysts suggest, but to keep alive the search for a new national vision that Mr. Nakasone ger prime minister can work in this launched.

"Suddenly, we've achieved our distant goal," said Naohiro Amaya, a former official at the Ministry of International Trade and Industry who now heads a private research instinute. "Under Takeshita, Japan political identity as a national fig-ure in Mr. Nakasone's image. In his which is deciding where to go still has to solve its basic problem,

OPINION

Hope From Pyongyang

Is it possible to imagine a North Korea whose leaders admit their economic difficulties, acknowledge South Korea's successes and disavow the dream of reuniting the peninsula under their strange brand of nunism? That is the remarkable portrait painted by Selig Harrison, an American writer, after a recent stay in Pyongyang. [The article, first published in The New

York Times, appears on this page]. Kim II Sung, North Korea's 75-year-old leader, is nothing if not unpredictable, and there is little to go on but words. Still, this impovenished militaristic nation, whose Soviet and Chinese allies court economic change, might just be seeing some light. South Koreans and Americans have nothing to lose and much to gain by tending the tentative shoots with care and receptiveness.

The very fact that a Western writer could act such access and apparent candor from North Korean officials is something. When it comes to secretiveness, only the likes of Albania and Afghanistan have rivaled North Korea. Mr. Kim, one of the world's ongest-ruling leaders, also cultivates perhaps the most excessive personality cult.

Vaunted as the man who can turn sand into rice and branches into bombs, be is trying to create the world's first Communist dynasty by making a leader of his son, Kim Jong IL But support for the son seems lukewarm, and the economy spirals down.

In the three decades since the Korean

War, the South has gone from primitive agriculture to a thriving high-tech economy and now turns to developing its political system. Yet in the North, military expenditures devour a quarter of the gross national product. If Mr. Harrison's impressions are correct, the leadership sees the inevitability of redirecting some of those resources. Pyongyang's talk of force reductions in

conjunction with a withdrawal of American troops from the South is nut new; what is new are the hints to Mr. Harrison about how and when to achieve this. Similarly, there has been talk for years of peaceful federation rather than reunification by force. But Pyongyang now speaks of a gradual, step-by-step approach and allowance fur separate political institutions and armies. For all this rhetorical sweet reason, the West still waits for actions. Pyongyang could prove its new practicality by reducing tension along the demilitarized zone.

At the same time, while Washington and Seoul need to respond with skepticism, so they need to be attentive. It makes sense that Pyongyang, pressured by Moscow to address its economic problems and facing a leadership succession, would want to re-duce hostilities and use scarce resources more productively. It does not make sense to assume the status quo in the North. It is time to encourage, and test, those in Pyongyang whn really dn want change.

- THE NEW YORK TIMES.

'It Is Not a War Now'

Soviet Jews wishing to leave their country stand now at a poignant intersection where the pain of being denied meets a new but still restricted possibility: being allowed to go. Members of their community, especially those who are well known in the West and who have been insistent about departing, are being allowed out in numbers reflecting the Kremlin's calculation that emigration helps improve U.S.-Soviet ties. But many wouldbe emigrants are not being permitted out, and their plight compels concern.

The story of two sisters is typical. One sister, Nina Raben, with her husband and daughter, had been a refusenik, as those denied visas are called, for eight years; sustained by the pride and comradeship that come with the decision to emigrate but furced to pay the society's harsh penalties of harassment, isolation and loss of work and educational opportunity. Only last spring were they allowed to leave, they now live in the Washington area. But they left behind the second sister, Elena Raben, and her husband and son, who were denied visas. Why would one sister and her family be allowed

out and the other not? "Only during a time of war are families torn apart," points out Nina Raben. "It is not a war now

Elena Raben and her family were denied visas, also after eight years, on grounds that her father-in-law, a retired engineer who was not asking to leave, had once had access to state secrets. The concept of "state secrets," a broad category in the Soviet Union, distinguishes Soviet emigration policy. Nowhere is it publicly written what state secrets could keep a wouldbe emigrant or a relative from emigrating. Nor are rejected applicants told what secrets figured in the denial. Mikhail Gorbachev announced in 1985 that secrets could not bar their possessor's emigration after 10 years, but in practice it can be longer.

The limbo of "state secrets" is unjust; it causes anguish and separates families. Emigration procedures desperately need to be touched by the modernization Mr. Gorbachev promises Soviet society as a whole. The forthcoming summit meeting offers him a good occasion to report the change.

- THE WASHINGTON POST.

One City, Every City action in city hiring and contracting. It

Mayor Harold Washington of Chicago, who died Wednesday at 65, loved to tweak political enemies and delight supporters by declaring, "I'm going to be mayor of the city of Chicago for 20 years." After his reelection to a second term last spring, it looked as if he might. Now, with his sudden death, assessments are in order, and they underline an important point: More than race, problems of the underclass are the

tension between police and citizens. It also meant equal opportunity to yield to temptation, like the bribes that two Washington-bloc aldermen were convicted this year of taking. As was the case with Mayor Daley, however, scandal never touched Mr. Washington personally. What his mayoralty did not mean, sad-

meant a black police chief and reduced

ly, was any tangible improvement for Chicago's vast black underclass. The city's public schools, overwhelmingly poor and minority, were recently described by the U.S. secretary of education, William Ben-oett, as the worst in the oation. After four years under Washingtoo appointees, the Chicago Housing Authority is oear insolvency. Gang violence characterizes daily life for many of the 144,000 persons whom the authority bouses, and the police seem unable or unwilling to clamp down. With oo heir apparent, Mr. Washing-ton's death may usher in a new political struggle, possibly along racial lines. But if his mayoralty demonstrated anything, it is that the problems of the urban underclass vastly transcend race. - THE NEW YORK TIMES

North Korea Sounds a Revolutionary Note of Realism

PYONGYANG, North Korea -- North Korea has lost faith in its ability to reunify Korea under Communist rule and is prepared to negotiate peace with South Korea and the United States after next month's presidential election in the South. This was my conclusion after 10 days of talks in Pyongyang last month with a variety of North Korean leaders, including Prime Minister Li Gun Mo, Foreign Minis-ter Kim Yong Nam and Hwang Chang Yop, the powerful secretary of the Korean Workers' Party Central Committee responsible for foreign policy. Economic pressures appear to be compelling North Korea to pursue two related priorities: a reduction of military spending

You will find us very flexible,' one official said.

through an accommodation with Seoul and Mashington, and a rapid influx of advanced industrial technology, facilitated by a China-style economic opening to the West. Underlying both of these policy departures

is a new note of realism in the North's perceptions of the South. Officials nn longer discount the South's economic growth, as they did during an earlier visit in 1972, oor do they equate opposition to military rule in Secul with potential political support for the North.

Asked whether the upsurge in opposition strength in South Korea this year foreshad-owed a shift to the left and an eventual Communist revolution, Hwang Chang Yop replied: "Such a thing is quite impossible Nearly 40 years have passed since the Korean War, and we recognize that many changes have occurred in South Korea. The opposition parties are not geared to changing the social and economic system in the South. If they are successful, it would not be a revolution, unless you would regard a democratic regime less beholden to the United States as a revolution." The economic arithmetic of the Korean arms race may explain why the North wants to

reduce its defense expenditures: The South, with 42 million people and an American mili-tary presence, devotes 7 percent of its gross national product to defense, and pursues ever higher consumption levels, while the North, with 20 million people and no foreign troops, spends 24 percent of its gross national product on defense at the expense of consumer goods production and other development oceds.

Seoul points to North Korea's military spending level as evidence that Kim II Sung still intends to reunify the peninsula by force. But North Korea insists that it is ready to cut its armed forces to 100,000 if Scoul would join

tional and nuclear forces. In a recent proposal to Secul and Washington for negotiations to be held next March, after the election, the North suggested that force reductions be completed within five years. Fureign Minister Kim said that the deadline is negotiable, and did not rule out 10 years, with American air and naval forces remaining longer than ground forces. On verifi-cation and other key particulars, 1 found Pyongyang officials ready in compromise and in discuss details of how the agreement could operate. Prime Minister Li said that an arms reduction agreement "would relieve many of our economic problems by releasing manpower and funds needed for our civilian economy,

adding that the government wants to promote "a great upsurge" of consumer goods during the first four years of the new seven-year economic plan, but that 'how much we can shift to light industries depends largely on how much we can reduce our defense burden."

I found it much easier to have productive ive-and-take with North Korean officials than give and take with North Korean outcast and 15 years ago. No subject was taboo, though there were flashes of anger and hitle enlighten-ment when 1 mentioned the health of 75-yearold Kim II Sung, the ability of his son and herr apparent, Kim Jong II, to govern, and the 1983 Rangoon bombing that killed 17 South Korean officials. On most issues, I found a readiness to go far beyond published positions and to re-spond directly to sharp challenges that would previously have produced predictable thetoric. In its formal stand on the unification of Korea, Pyongyang advocates a federation. Autonumous regimes with differing systems would remain intact in North and South, but a "federal" government would have a combined army and a standing committee to "supervise" the two "regional" governments. This would be a transitional step on the road to full unifica-tion, with "the people" deciding when, whether

and how to change the structure. Not surprisingly, Scoul has dismissed this idea, arguing that Pyongyang would simply use the interchange that would occur under such a m to promote subversion in the South. When I criticized the North's proposal as unrealistic, Hwang Chang Yop and other high Central Committee officials retreated from their prepared remarks. "You will find us very flexible," said Mr. Hwang, "if we are all going in the same direction, toward confederation, rather than toward legitimizing two Koreas." In the North's evolving concept, Mr. Hwang

said, federation is no longer a transitional stage in a mutual forces reduction agreement linked to a parallel withdrawal of American convensaid, redetation is no longer a transitional stage but the "final stage" of unification, and there is no longer any provision for integrating the two differing social and economic systems. In prin-ciple, a combined army would be an ultimate

ciple, a commend army would be an unmate goal, but "if we can improve relations between the two Koreas, then having two armies would be acceptable, especially if their size can be reduced." Mr. Hwang implied that Pyongyang is prepared to go along with a creeping process of "cross-recognition" of the two regimes by the process process in the context of parallel the major powers in the context of parallel movement toward a limited confederation. "Cross-recognition" (Soviet, Chinese and U.S. recognition of both North and South) is

the stated goal of American policy. It has been rejected by the North. But Mr. Hwang hinted at a compromise when asked whether he would like to see formal U.S. diplomatic relations with Pyongyang or would prefer to have the United States wait until it could have relations with a confederal republic. He said that a haison office would be appropriate after the signing of a peace treaty, and that full relations pressed a favorable attitude toward confeder oon, even if it is not actually achieved."

Asked about the future of Pyongyang a security links with Moscow and Beijng Foreign Minister Kim said that "there is nothing immutable in our undertakings just as we hope that there is nothing immutable in the present form of your relations with the South." "We intend to strengthen and develop our relations with the United Stime in the days ahead," he said. "We want be anced relations with the major powers. This is in our interest, and yours." "Once we fought a war," he added, "but

we cannot continuously maintain an abnomal relationship. The past is past."

The writer is a senior associate of the Came gie Endowment for International Peace, and a former foreign correspondent. His visit to North Korea, from Sept. 23 to Oct. 2, something rivey permitted to American journalists, was made under the auspices of the Carnegie Endowment He contributed this to The New York Times

Enter a New Generation of Leaders

K IM Jong II has been steadily consolidat-ing his control, nbviously with his fa-ther's personal imprimator. With the presi-dent and Defense Minister O Chin U, be is nn the three-man presidium; be is a top member of the party's powerful Military Committee.

A younger, technocratic elite is emerging as Kim Jong II has moved to build his own power base. The Party Scretariat, the day-to-day decision-making body, is now made up mostly of technocrats in their 50s. Li Gun Mo, who was named prime minister last December, is a competent economic planner and administrator. And a new generation of cadres, who are generally well-educated and have study or travexperience abroad, is taking over in the ministries from the old war veterans.

Inside the military, O Guk Ryol, who is in his mid-50s and reportedly was a classmate of Kim Jong II at the Mangyongdae Revolutionary Institute, was made army chief of staff in 1979. Many other graduates of this elite institution have moved into command positions.

As for Kim Jong II himself, it may be too early to judge whether he has the political acumen and leadership skills to govern North Korea. He has only limited exposure ontside Korea -- his only travel abroad in the past decades has been to China - and his ability to handle world affairs remains untested. In the meantime, North Korea faces formi-

dable challenges. Officials in Pyongying an pained that Secul alone apparently will host the Olympic Games in 1988. They are troubled at the way Beijing has forged closer military-ties with Washington. They have had to be-come immensely more reliant on the Soviet Union, which now provides large ounders of MiG-23 fighter planes, SAM-3 missiles and other assistance, both military and economic. But in return, sources say, the Soviets have pressed North Korea to allow them to establish naval bases there. Pyongyang has declined, but in its present isolation, may not be able to bold out long. North Korea blames Washington and

Seoul for pushing it into Soviet arms. In an attempt to reduce tensions, the U.S. State Department has, since March, permitted American officials to have dialogues with North Korean diplomats. That is a positive p, but much more must be done.

The time is ripe for America to open scholar ly, journalistic and economic exchanges with North Korea. And the annual U.S.-South Korean military exercises should be suspended or . scaled down. Such measures appear certain in bring a conciliatory response from the North

The Good News: Consensus Government Is Beginning to Work

WASHINGTON - The good W news in this Turk software week is that constraint government is beginning to work in Washington and it is

likely to continue. Prospective successes for the policy managers now in office are more numerous and significant than generally realized. And those successes are likely to influence in a positive way the character of the next president and his government.

A budget agreement, reducing def-icits by \$76 billion in the next two years, has been signed. Congress will deliver on it, almost assuredly, because the consequences of reneging

are too scary to contemplate. Further assurance for the fragile orld financial picture lies in the By David S. Broder

antional affairs, both at the regional mer of manify and judgement when and the superpower levels, A slow, can work comfortably with those in precations process of reconciliation and negotiation is under way in both Nicaragua and El Salvador. Mikhail Gorbachev is on his way

that will remove intermediate-range ouclear missiles from Europe. He comes amid brightening prospects for the state of issues ranging from Arghanistan to strategic arms. Hard-lining, head-bashing and

demagogic provocation have lost appeal. The vacancy on the Supreme Court apparently will be filled by

Congress, the departments and foreign governments who may differ with them at times. George Shultz, James Mikhail Gorbachev is on his way Baker, Howard Baker, Alan Green-to Washington to sign an agreement span and Mr. Carluori command rospect. The great exception, Attorney General Edwin Meese, has at least temporarily seen his influence with the president eclipsed. Given Mr. Reagan's dependence on the quality of the counsel he receives, this constellation of advisers encourages confidence.

What is more heartening - and surprising — is the growing recogni-tion that sensible and professional

outsiders, but men who by instinct and training are prepared to deal with the tongh policy constraints and the need for consensus that will confront the next occupant of the White House. George Bush and Bob Dole, the leading Republican contenders, are men of this type. Mr. Bush is so much an instinctive conciliator that the major challenge facing his candidacy is to articulate his basic priorities. Every-thing suggests that decision-making in a Bush administration would involve icus of consultation and negotiation. Voters still need to hear what, beyond his instinctive hospitality and good

will, he would bring to the table. Mr. Dole, a consummate insider, as moved from a background of

Most of the Democratic contend ers have displayed their skills for bracker times or in smaller areas, which is one reason they are underdogs. But Richard Gephardt and Al-bert Gore are identified with mocessful legislative compromises on tricky issues. Michael Dukakis in Massachusetts both preaches and practices "consensus" government. Bruce Babbitt learned some of the same tricks in Arizona, where opposition control of the legislature made

14. A

challenge for city governments today. Mr. Washington will oot be remembered as a great mayor; he never got a chance to be. After his stunning victory in a racially acrimonious three-way contest in 1983, most of his first term was spent in conflict with a white City Council majority led by Alderman Edward Vrdolyak. Ultimately, Mr. Washington gained control of the council, then strengthened his hand in the elections in April.

Mr. Washington called himself a reformer, but he also called himself a "sepia Da-ley," a reference to former Mayor Richard Daley, master of the machine. Mr. Washington saw it as his role to tilt city government more toward those who had been locked out - blacks, Hispanics and white liberals. That meant vigorous affirmative

The treaty signals a symbolic start of a new era in East-West relations. But this

renewed confidence presents oew political

and military challenges. The NATO nations must engage quickly in negotiations to re-establish the balance in conventional arms.

The superpowers have previously agreed

to put a limit on what they might do in

future but have never agreed to eliminate

weapons accumulated in the past. The cli-

mate is better now than it has been since the

heyday, short-lived and artificial though it is in retrospect, of the Nixon-Khrushchey detente. To a large extent this is [Mikhail]

Gorbachev's doing. But the Western allies deserve their share of the credit. They did

not let themselves be pushed around by the

dreary succession of Kremlin leaders -

Brezhnev, Andropov, Chernenko. NATO

agreed on the twin-track policy - negotiate and deploy - in 1979. Mr. Reagan pro-

posed the zero option. Mr. Gorbachev dou-bled it. At long last the gamble has paid.

- Le Soir (Brussels).

INF: The Gamble Paid Off

The agreement that Messrs. Shultz and Shevardnadze have concluded in Geneva on the "final details" of the Euromissile treaty confirms that the dynamic created just over a year ago by the "breakthrough" at Reykjavik is alive more than ever. It was disturbed oeither by Mr. Reagan's oumerous difficulties in the United States nor by the growing domestic political problems confronting Mikhail Gorbachev in Moscow. Once the Soviet leader agreed to set a date for his meeting with Mr. Reagan, the two partners were condemned to succeed.

- Le Monde (Paris).

Certainly, the benefits [of the agreement] appear much greater to the superpowers than to the European members of the North Atlantic Treaty Organization, whose latent fears of being deprived of the American nuclear umbrella have surfaced nuce again. It is difficult to argue that the abolition of a whole category of nuclear weapons does not, to some extent, affect NATO's strategy of flexible response.

- The Financial Times (London).

- The Guardian (London).

can easily blame others, as the Repub-

lican president and the Democratic

for years. Because the voting public

WASHINGTON - It is conven-tional wisdom to attribute the four-week-long struggle over the U.S. budget deficit to the institutional fricthous between the president and the Congress. But that is only part of the story. The more important part is the persistence of divided government: icits and divided government is obvithe condition that exists when one party holds the White House while the party holds the White House white the nther party holds a majority of one or both houses of Congress. Consider this: A federal deficit in and a majority of both houses, its elected officials would have to take

as sustainable, while a deficit above 3 percent is not. Since World War II, the deficit has climbed above the 3 percent level nine times. Every single time has been a time of divided government. That was so in 1948 (Harry Tru-

man vs. the Republican "do-oothing" 80th Congress), in 1975 and 1976 (Gerald Ford vs. a Democratic Con-gress), and in 1982, 1983, 1984, 1985, gress), and in 1982, 1983, 1984, 1985, 1986 and 1987) (President Reagan vs. a Democratic House in all six years as able, the public re-elects a high perwell as a Democratic Senate in 1987). Divided government is a recent

hennmenon. For the 150 years from John Adams through Franklin D. Roosevelt, America had party government (one party holding the presidency and a majority of both bouses) about 75 percent of the time. From President Truman through President Reagan, it has had divided government about 60 percent of the time For the last 20 years (Presidents

time. For the last 20 years (Presidents Nixon, Ford, Carter and Reagan) there has been divided government 80 percent of the time. In eight of these 16 divided-government years (including the last six), the deficit has (including the last six), the deficit has when the Republicans held the presi-exceeded 3 percent of the gross na-tional product. It is time to recognize crats held the House, Wilson's theme

Leadership Is the Most Serious Deficit

WHAT President Reagan said of the majority report on the Iran-contra W affair, that they labored and brought forth a mouse, could be said with more justice of the budget negotiators. With \$23 billion of cuts already assured by the Gramm-Rudman process, a month of face-to-face talks involving the most senior U.S. political leaders resulted in only \$7 billion of additional 1988 cuts. More cuts were promised in 1989, after the election. We shall see.

As the stock market crash made clear, what the markets really want from the U.S. government is leadership. The inability of U.S. political leaders to address either the budget or trade question has led to a loss of faith in the U.S. conomy. We need a Congress and a president who can do their part in these uncertain times. Once the leadership deficit has been brought under control, and Washington is once again capable of bold and constructive economic action, the markets will stabilize and the economy can grow.

- Waher Russell Mead, writing in the Los Angeles Times.

was the danger of divided government. "You have an arrested govern-ment," he said. "You have a governthat the twin budget and trade defi-dis have a shadow upper, the deficit in the incidence of party government. ment that is oot report ding to the winnes of the people. You have a government that is not functioning, a government whose very energies are stayed and postponed. If you want to release the force of the The relationship between deep defous. The voting public condemns deep deficits. So does every elected American people, you have got to get possession of the Senate and the presidency as well as the House."

The public responded to his plea. In Wilson's first term, party govern-ment laid the legislative foundations for the New Freedom, generally re-garded as the most creative period of some plan to reduce the deficit or be held accountable by an angry electornational government between the Re-But if a deep deficit occurs under a construction and the New Deal. divided government, every incumbent

It is worth oote that while the text of the U.S. constitution is silent on the subject, the Framers promptly set about organizing two broadly based political parties in order to make leaders of Congress have been doing their brave new experiment work.

There were only four elections dur-ing the 19th century in which the centage of those who have collectively party winning the presidency failed to carry a majority in both houses of Congress. In the 20th century, this brough the bage deficits about. Of the last five presidents who sought a second term at a time of divided government (Presidents Trunever happened until Eisenhower's second term. Io the last 20 years it has man, Eisenhower, Nixon, Ford and Reagan) all but Mr. Ford succeeded

happened four times out of five. What is responsible for this persist-shift to divided government? Weil-meant reforms five the primary Fur decades, more than 90 percent of congressional incumbents seeking re-election have been re-elected. In system and technological developthe 1986 election, 96 percent of all ments like television have made party Divided government has obviously been good for incumbents. But is it good for the nation? Woodrow Wilson thought not. In the 1912 campaign, when the Darublicant hald the measure policies and labels less important to voters, while making candidates' personalities more important. About one-third of all voters no

longer regard themselves as members of a political party. Even party members of a political party. Even party mem-bers have no quaims about splitting, their tickets. In 1900, only 4 percent of all congressional districts cast a majority vote for the presidential candidate of one party and the House candidate of the other. In 1984, this occurred in 45 percent of all districts.

The persistence of divided govern-ment will not be reversed until the voting public is ready to recognize its high costs. The last six years of dead-lock over domestic and foreign policy can serve to bring that lesson home. As Cassius might have put it, the

fault, dear voters, is not in our stars, but in ourselves, that we are ticket-splitters.

A Matter of Clear Thinking: What We 'Know' Does Hurt

Page 5

Mr. Bloom tells a story about what

eveo if both were right, they would be

wrong. It is oot what we do oot yet

know that is the problem; it is all the

Socrates's approach to imparting socrates s approach to imparting knowledge was to question the beliefs we have, before adding to them. He devised a method to achieve this and

called it dialectic, what we now refer

Taking such an approach to higher

education would be to go in the oppo-site direction from that of Mt. Bloom

site cirection from that of Mr. Bloom and Mr. Hirsch, who would rather teach us what to think. Learning how to think requires a rigorous form of train-ing that should begin long before stu-dents reach college age, before it is too late to break through prejudices

Critical thinking is a technique that also requires the active participation of

teacher and student, one-on-one. Instead

of pronouncements made and memo-

rized, insight is achieved one step at a

time, after honest mutual confrontation. Secretary of Education William Ben-

nett has said that classroom education

can just as easily involve large numbers,

such as are to be found in Japan. That might be true if American society were

so monolithic that first assumptions

were more or less uniform, or if educa-

tion were just a matter of conveying facts onto an already clean slate. But

this cannot be so once minds are filled with half-truths and prejudices, with so

many false beliefs. Otherwise ignorance

persists alongside what we know.

late to break through prejudices.

to as conversational reasoning.

false things that we already believe.

By David Glidden increase the danger of their ignorance.

R IVERSIDE, California - It is the inevitable consequence of student-Lately, huodreds of thousands of Americans have been worrying about faculty contact: A young woman approached me after class, embarrassed by what has gone wrong with higher education, worrying enough to put Allan Bloom's "The Closing of the American Mind" and E.D. Hirsch's "Cultural Literacy" oo the hest-seller lists. what she had to tell me, something too personal to discuss on campus. I agreed to meet her at a local coffeehouse. There, she confessed what was on her mind: went wrong in the stratosphere of Ger-manic philosophy and its alleged ma-lign influence on U.S. universities. Mr. You were once a Cheyenne warrior in a previous existence, and I nursed Hirsch composes a list of things every American should know. The trouble is,

MEANWHILE

you back to health after you'd been wounded by an arrow through your heart." The only response that I could think of was to thank her.

units of was to thank her. This was a serious student, quite proficient at deciphering Plato for me and whatever informational tasks her other courses required of her. She was also quite convinced that she had lived other lives. Nothing that she might have learned in biology about how neurons grow and memory works could have persuaded her that it is physically impossible to carry memories over from another life. There might be something specifically Californian about incidents such as this,

but I suspect they are not regional; they testify to a certain persistence of irrationality among people everywhere. Socrates said that learning was first and foremost a process of discovering what it is we wrongly thought we knew, of exposing ignorance before going on to knowledge. Merely adding bits of wisdom to a mass of foolishness will nnt make people wiser. It will only

A Violation of Trust

In "For Some Israelis, the Good In For some Israeus, the Good News Turns Out to Be No News" (Nor. 7). Thomas L. Friedman correctly notes the relief Israelis feel as a result of the peace and quiet provided by the Israel Broadcasting Authority strike. But he fails to mention the lesson that should be learned from the strike.

For months Israelis have been victimized by disruptive TV and radio joh actions. This bas resulted in complete apathy by the public to the cause of those responsible for the disruptions, When public employees violate the publie's trust by exploiting their monopoly, they canoot expect to receive the support of their vicum.

Casanova's Return Venice plans to ask Czechoslovakia for the remains of Giovanni Giacomo Casanova, the Venetian author and adventurer chiefly remembered for his relentless amorous pursuits. Casanova died in 1798 in the castle of Waldheim in Dux, a small town near Bratisla-

The man behind the idea is Augusto Salvadori, the city tourism director known mainly for waging a war on "sleeping bag tourists." A Rome daily, La Repubblica, said Mr. Salvadori hoped Casanova's remains would arrive in time for Carnival in February. The newspaper said negotiations already were under way, but a spokesman for Mr. Salvadon's office said: "It is only the germ of an idea; nothing has been done about it."

In Casanova's lifetime, the Venice city fathers did not appreciate his activities. He was denounced as a sorcerer and sentenced to five years in prison, but he managed to escape. He made the rounds of the courts of Europe and spent his final years as a librarian for Count von Waldstein.

Bulgaria to Offer More Candidates

Bulgaria plans to change its electoral laws, allowing for an unlimited number of candidates, according to the BTA press agency The project is in line with other recent changes announced by Todor Zhivkov, the country's leader, to streamline the bureaucracy and allow people a greater say in

local government. Public organizations and workers' groups would be allowed to nominate their own candidates for public offices on regional and local levels. This will promote "more competitiveness and open-ness in the selection of candidates," the press agency said. Under the present system, nnly candidates nominated by the Communist Party are eligible. The winner will have to obtain

more than 50 percent of the vote | foreign royalty,

EUROPEAN TOPICS

FROM GREEN LINE TO BERLIN WALL - President Amin Gemayel of Lebanon standing on a balcony of the Reichstag, the old parliament building overlooking the Berlin Wall, on Thursday. The Lebanese president is on a two-day visit to West Berlin.

The Wannsee Villa in West Berlin, which housed the 1942 if more than half of the electorate takes part in the voting. The phrasing implied that the habit-ual mandatory voting might be abolished. BTA did not say when the changes would be enacted. In August Bulearie nessed conference at which Nazi officials decided on the "final solution of the Jewish question," will be mored into a memorial and In August, Bulgaria passed a law transforming the country's 28 education center. The building will be used to document the conference and the Holocaust, in districts into nine regional administrative units and abolished which six million Jews died. It or merged several government also will house libraries and be ministries and departments. available for meetings. Heinz Galinski, a Nazi death camp survi-

Checks made on ski lifts and cable cars showed that 170 of 795 singleclined comment. The queen is sovereign of the orders, and the only other female members were cable lifts were seriously defeotive, Faulty concrete foundations

were found on 15 lifts. Mr. Douffiagues said one architect would be put in charge of all ski-lift safety in France, in an effort to prevent a repetition of the accidents last year, when no single government bureau was responsi-ble for safety.

Sweden's image abroad has not changed despite recent scandals, according to a government committee investigating state contri-butions in information campaigns and cultural exchanges. The committee's report included a supplement in which 17 prominent Swedes related how their foreign friends saw the country, "Sweden's reputation abroad is intact," said Erland Josephson, a Swedish actor, "We have funny drinking habits, we copulate dili gently and then commit suicide after paying a dreadful amount of tax." Sweden has been shaken by several scandals in the last two years, including illegal arms sales to blacklisted countries by the arms group Bofors, and the un-solved murder of Prime Minister Olaf Palme.

French Party Leaders Back Fund Reform

By Edward Cody Vashineton Past Service PARIS - Pressured by accusa-

tions of shady finances, France's major political party leaders vowed Thursday to work for new laws limiting campaign expenditures and subjecting political fund raising to increased public scrutiny.

The party heads declared their readiness to reform in connection with an unusual conference called by Prime Minister Jacques Chirac. Mr. Chirac called the conference

in response to a spreading public perception that under-the-table financing of French political parties and candidates has grown considerably in recent years to keep pace with rising costs of running for office. were in power. Effective laws to require an ac-

counting of personal and political government asserted that Mr. Mit-terrand had appealed for financial reforms only to divert attention from charges of responsibility in the Iranian arms sales.

obliged to take up the challenge and called in leaders of his own Political figures predicted that Rally for the Republic party; its laws on personal financial disclo-sure and campaign expenditures might be passed before the presi- Socialist Party; the Comm dential elections in the spring. gestions for public funding or open accounting, have languished in Mr. Toubon said in a statement: "The RPR considers it is necessary Parliament over the years. Concern to adopt, before the end of the year over the issue has increased in reand to put into effect without decent months, however, particularly in the atmosphere of public distrust lay, dispositions that can concern presidential election: declaration of personal wealth, ceiling and controls on expenditures, budget contributions and private dona-

tions." The Communist Party leader. Georges Marchais, said that the meeting had produced "declara-tions of good intentions," but he added, "When you get down to concrete issues, things become

more difficult " Some members of Mr. Chirac's A statement issued by Mr. Chirac's office said that another meeting would be held within two weeks for further discussions on what could be done. It said nothing about what Mr. Chirac himself Nevertheless Mr. Chirac feit thought should be done.

Jean-Pierre Chèvenement, the industry and education minister in conservative coalition partner, the the former Socialist government Union for French Democracy; the and a member of Parhament who is also the mayor of Belfort, said Wednesday that the subject was mist delicate because city hall contracts dier arrested. The woman and child

contractor order a fictitious study from a friend of the mayor's party, with the cost usually a small percentage of the contract. Payment light C

for the study then is divided, with a third to the local party apparatus, a third to the national party coffers and a third to the study's authors, he said.

British Arrest Soldier in Berlin

The Associated Press BERLIN - British military po-

licemen went to East Berlin and arrested a British soldier who was trying to smuggle an East German woman and her child into West Berlin by hiding them in the trunk of his car, diplomatic sources said Wednesday. The sources said the incident oc-

curred Nov. 13 when the soldier, who was based in West Berlin, was stopped by the East German po-lice. The Briton was in full uniform and driving a car with Allied li-cense plates, the sources said. The British were called in and the solthey judged as highly remote the Front. possibility that party finances, the Jacques Toubon, the secretary and large government purchases were turned over to East Germans.

In Asia, AIDS Frankness Can Be Elusive

MANILA - Some Asian govcountries for fear it might scare away tourists, doctors and other "Some of these countries are playing it very cool," said Dr. Jean-pleyeng allein head of Medical Re-biory that it conjubad on the doce biory that that the doce biory the do

Pierre Allain, head of Medical Research at Abbott Laboratories, Chicago. "They're afraid of scaring people away." Nations in Asia and the Pacific are said to have less than 2 per cent of the 64,000 known acquired immune deficiency syndrome cases worldwide.

But scientists and doctors at an rect. international congress in Manila on AIDS in the region said privately they thought that number was isleading.

Dr. Allain, whose French-U.S. The Bangkok government says it have assured WHO that they would MANILA — Some Asian gov-ernments have been keeping quiet warning test that could signal when September it was setting up a spo-on the extent of AIDS in their a person carrying the AIDS virus is cial Health Ministry committee to

funds would mark a departure in French political life. Parties and noliticians in France traditionally have kept sources of their financial backing secret, and many people have long assumed that underhanded fund raising is part of the system.

said

created by a series of reported political scandals. President François Mitterrand called for reforms as part of his denial of a declassified Defense Ministry report saying that Mr. Mitterrand's Socialist Party might have received kickbacks on illegal sales of artillery shells to Iran, in 1984 and 1985, when the Socialists

La Scala Opening

Verdi is the usual fare for the traditional Dec. 7 open-ing of the opera season at the Teatro alla Scala, but this year it is "Don Giovanni," a celebration of the 200th anniversary of Mozart's masterpiece. Riccardo Musi will conduct and the production is in the hands of Giorgio Strehler. Thomas Allen and Jose Van Dam will alternate in the title role (nine more performances are scheduled through December) and Van Dam and Claudio Desderi will share the role of Leporello.

PARIS

New Magazine for Collectors

L'Objet d'Art, a magazine devoted to Old Master painting and the decorative arts before 1950, has just gone on sale. Backed by the publishers of the successful Beaux Arts magazine launched four years ago, the new publication is more specialized and sets its sights on an older age group and on serious collectors. Unlike art maga-zines that offer a mix of ancient and contemporary art, with photography, interior decoration and design thrown in, L'Objet d'Art strives to be resolutely unmodern, and to explore its subjects in lavishly illustrated detail.

Egyptian Artist's Delicacy

The Egyptian sculptor and painter Adam Henein had a precocious intimation of the possibilities of art when he was taken to the Museum of Egyptian Antiquities in Cairo for the first time at the age of 8. The delicate inflec-tion of each plane that is so typical of the sculpture of the Pharaonic period provided him with an aesthetic criterion that be constantly applies in his own work. In the present show sculptures are mingled with abstract paint-ings on papyrus, which are marked by an exceptional and radiant warmth. Hencin is a unique case in contemporary art because, while he is open to contemporary values, he is above all solicited by the desire to recapture this deep and wordless intimatioo that first came to him in early childhood. In this way, too, he resolves the difficult problem of identity that so often hampers Third World artists when they work in a Western idiom. What Makes Opera? **A Wider Definition**

popular audience. Now, not only is the mainstream of the repertory from Mozart through Puccini thriving, but the whole field is expanding to include loog-forgotten areas of operatic endcavor and oew ones, to embrace works that not so long ago were excluded from the opera house by definition, and contemporary composers who until recently would not have been caught dead within its precincts. The Baroque and early music revival has reclaimed a host of magnificent works that reclaimed a nost of magnificent works that can be made to speak to new audiences and are enjoying astonishing popularity. The thirst for novelties has brought back 19th-century and early-20th-century rarities from Weber to Weill. Central European opera companies have long admitted the American musical to the operetta wing of the repertory, and even if Stephen Sond-heim her out always set European op fire heim has oot always set Broadway on fire, the New York City and the English National operas have found room for him. The minimalist composer Philip Glass has emerged from New York's SoHo and experimental theater to become highly successful at getting commissions from European opera houses, and at filling those houses

of Paris? The safest one might be a sweeping one, say, that opera is just about anything that requires the resources of an opera company to perform - voices, orchestra, chorus, dancers, technical support of all kinds.

Bellini's "Norma," now in a new produc-tion at the Paris Opera, fits handily into any mainstream definition. "Porgy and Bess," back in Europe in the Houston Grand Opera's pioneering production; has pretty much won recognition as the opera Gershwin said it was. And the northern city of Tourcoing has just been the site of a new bridgehead, an "opera-tango" called "Ma-ria de Buenos Aires," whose composer, Astor Piazzolla, has a musical past that includes 25 years of playing in Buenos Aires cabarets, studies in Europe with Nadia Boulanger and Hermann Scherchen, and is the author of music that has made him a controversial (in Buenos Aires) reno-

Instrumental has produced a string of strange but ingenious quasi-operatic col-lages — usually original texts to which existing music is adapted, often in unexpected, oot to say bizarre, ways.

R OMANO was taken with "Maria," and some years later tried to get Piazzolla to agree to a scenic ver-sioo. (By this time Romano, Zulueta and Piazzolla were all living in Europe.) The composer resisted, "I was afraid of Jacobo and Jorge," he is quoted as saying. "Their work seemed to me a little crazy." Crazy but full of ideas, and persistent. Piazzolla ended by agreeing, and after a number of false starts the world's first opera-tango reached the stage last Friday at the Atelier Lyrique in Tourcoing - where Baroque opera is the standard fare. For the stage version, Piazzolla and Ferrer expanded music and libretto into 22 short scenes in two acts, a kind of musical fresco of which the tango in various forms is the base. Romano and Zulucta are credited, respectively, with the scenic and musi-cal "adaptation." The number of characters grew and so did the orchestra, with triple strings, string bass, flutes, percussion, piano, electric guitar and a bandoncon the German-born, Argentine nationalized member of the accordioo family now indis-pensably associated with the tango. The characters are more types than persons. Maria (the splendid mezzo soprano Margarita Zimmermann) is a woman and a kind of incarnation of Buenos Aires; killed by her protector, she returns in ghostly form, undergoes a kind of ethereal concep-tion, and comes full circle by giving birth to another Maria. The part, and the three team that under the name Grupo Acción other women's parts (really multiple roles)

"Shaker Loops," a oew ballet by Hans van Manen set to music by John Adams, will have its first performance by the Stattgart Ballet Nov. 29 as part of a triple-bill of works by the Dutch choreographer. Also on the program are "Bits and Pieces," to music by David Byrne and Bri-an Eno, a Stattgart premiere, and a work already in the company repertory, "Corps." set to Berg's Violin Con-certo. Sets and costumes for all three works are by Keso Dekker, and Ashley Lawrence will conduct the Adams Dekker, and Ashley Lawrence will conduct the Adams and Berg scores.

ZURICH

Edward Munch Retrospective

"The Cry," Edvard Munch's best-known work, is the stuff of which all fears are made. The Norwegian artist (1863-1944) drew from his own torment: The loss of his mother when he was 5, the death of his sister at 15, his father's helplessness, unhappy love affairs all fed his attempt to paint the range of

human emotions. From his grief came masterpieces such as "The Sick Child" (above). Happier memories are evoked by scenes of young bathers, views of 19th-century Paris, where he studied and was influenced by Seurat and Cailleboure. There are the portraits of women he loved, and of friends such as August Strindberg, as well as many self-portraits, from the young dandy smoking a cigarette to the ghostly, hollow-eyed figure wandering around his lakeshore home oear Oslo. At the Kunsthaus, Zürich until Feb. 14. (Mavis Guinard)

NEW YORK

Art and Antiques Center

and a second second

Place des Antiquaires, the new international center for fine arts and antiques, opened on Nov. 18 at 125 East for fine arts and antiques, opened on Nov. 18 at 125 East 57th Street with a gala benefit for the Metropolitan Op-era House and a complementary exhibition, "L'Art et L'Opéra," of rare opera costumes, photographs and memo-rabilia from the archives of the Met. Place des Antiquaires houses dealers from Europe and Asia as well as the United States, and aims, says director Judith Applegate, to "present superb collections _____the finest under one roof in America." There are two concourse levels of galleries, shops and exhibition halls, occupying 50,000 square feet in a new office tower.

What kind of definition of opera would be necessary to cover some of the season's recent events in or within striking distance

vator of the tango. Piazzolla has in common with Gershwin that they sought to marry Old World form with New World content, art music and popular, and in common with Brecht and Weill that "Maria" and "Threepenny Opera" and "Mahagonny" portray a world of nocturnal, urban low life, of bordellos, gigolos, prostitutes and their protectors.

"Maria de Buenos Aires" started out in 1968 as a "little opera," with a text by Horacio Ferrer, that ran for four months in Buenos Aires in concert form and was saved from oblivion by a recording. It employed two singers, a speaker, and Piazzolla at the head of a 10-piece orchestra. A frequent member of the audience was Jacobo Romano, who with Jorge Zulucta forms a

tango singers. The male characters are El Duende, an evanescent yet ubiquitous night spirit, and his sidekick Tito the Tangoist; Gorrion Porteño ("swallow of the port"), Maria's melancholy first lover (Hernan Salinas, whose warmly rough baritone is richly evocative), and Gato Ricardo (Ma-ria's protector-killer, a danced role taken by Gigi Caciuleanu, who also did the styl-ized choreography (or other sequences). Bruno Pizzamiglio, Italian-born and Argentine-trained, was the conductor, and the orchestra's sound was dominated by the virtuoso bandoncon of Juan Jose Mosalini, a Paris-resident Argentine composer.

OR the set, Zulucta (who played piano in the orchestra and doubled as designer) conceived a stage-filling bandoneon that opened in its folds and at its extremities, a kind of musical Pandora's box that Romano's staging manipulated to let the characters materialize and vanish with almost spooky suddenness. Paco Rabanne's costumes evoked a milicu of swank

tackiness.

lo a program interview, Piazzolla ex-presses the hope that he has made a suc-

Colon in Buenos Aires is interested in it. The tango is limited in its origins and format - which accounts for the need to rely on short scenes of almost cinematic speed - but it can be of potent expressive power. Ferrer's text is said to be written in a bighly personal argot, but incomprehensi-bility of textual detail has never fatally damaged an opera's chances. If "Maria de Buenos Aires," despite telling and poetic moments, seemed to add up to less than the sum of its fascinating parts, it may have been because of a certain intellectualized typing of characters or of stylistic shifts between reality and dream (the ghost con-vent, the circus of analysts, the marionnette bordello). Or maybe the passage of time will prove otherwise.

Clint Eastwood Celebrates Charlie Parker

by Mike Zwerin

THE SCENARIO for the film titled "Bird" currently being directed and produced by Clint Eastwood ends with the graffito "Bird Lives" scrawled on a New York wall, Bird was Charlie Parker and it was scrawled on many walls after his death. It has a defiant ring to it and Bird does indeed live. We can expect a lot of high-flapping words to be printed about "Bird," which winds up shooting next week and is sched-uled for mid-1988 release. "Will Clint Eastwood make Charlie Parker fans' day?" has already appeared. In "Celebrating Bird," his American Book Award winner, Gary Giddins writes that Bird's "life and personality are subjects of great passion; his women especially are caught in the play, each championing her own gospel."

This subject is not one to treat flippantly. Bird is a subject is not one to treat impantly. Bird is a subject of great passion; no laugh-ing matter. But laughter is serious business, and genius, no matter how influential, is incomplete without a giggle along the line. Happily, Joel Oliansky's script for the film is about as far from a downer as could be ware to from a downer as could be expected from any story about a junkie alcoholic genius wrestling with his demons. The Hasidic wedding trumpeter Red Rodney (born Robert Chudnick) worked

• · · ·

with Bird and Thelonious Monk is included, as is the tour through the segregated ed, as is the tour through the segregated South during which Bird passed Rodney as black with the billing "Bluesman Albino Red." And in 1955, when a doctor asked the terminally ill, 34-year-old Bird if he ever drank alcohol, this gargantuan imbib-er of a connecopia of elixirs and powders are black and the terminal to the a cherty before replied: "Sometimes 1 take a sherry before dinner.

But the larger view and continuing relevance of Bird's alienation is part of the persistent alienation of jazz from art music in general. Giddins, whose "Celebrating Bird" is being published in softback in tandem with his one-hour documentary video of the same name, elaborates: "Despite [his] incalculable influence-

... [Parker's] admirers wonder at the absence of civic honors (statues, streets, parks, stamps), though a more acule absence is that of adequate recognition in studies that purport to evaluate 'serious' music.'

Although, according to Rodney, Bird could barely notate music and understood barmony principally by instinct, he would insert a phrase of "Alice Blue Gown" in any key at any time in the middle of an improvisation on any tune in honor of a passing lady in a blue gown. Although he had no college degree, Giddins says "he seemed to know something about everything." He was an avid reader, played chess, discussed politics with politicians and science with scientists; he analyzed the works of Arthur Honegger and Igor Stra-vinsky, he could clean and cook rabbits. The Ukrainian working-class beer drinkers in his neighborhood bar didn't even know he was a musician. Eastwood chose Forest Whitaker ("Pla-

toon." "The Color of Money") for the lead because "he combioes pathos with an ingratiating smile." Diane Venora (who once played the role of Hamlet in the New York Shakespeare Festival) is Chan Parker,

· · · · ·

Bird's wife. It remains to be seen if moviegoing Middle America is ready to look at a loving relationship between a black man and a white woman (they had two children together), although Eastwood says he never considered this a problem.

The legions whose lives were changed by Bird, particularly people of his race, feel possessive about him. Some are asking why the focus oo Red Rodney (played by a Canadian actor, Michael Zelniker) rather than on Miles Davis (Rodney's predecessor in Bird's quintet), on Chan rather than on some of Bird's other (black) women. Several musicians are offended that the movie was written and directed by whites and in general focuses on Bird's relationships with whites.

HIL Schaap, a New York disc jockev who has been playing Bird records for an hour a day five days a week since 1981, explains Bird's universality: "He's a bridge to either side of the spectrum. People who would think I'm old-fashioned if I played Count Basie or who might feel left behind by John Coltrane can all agree on Bird." Schaap is also what he calls a "disc-restorer." and was responsible for "wiping off" the rhythm sections oo several Bird recordings for the

film track ("Just Friends," for one).

The soundtrack coordinator, Lenny Nie-haus, explains the process: "We were able to isolate Bird's solos and enhance them by using the latest digital technology. Recording quality was not so sophisticated back in the forties and fifties so we could not use the original recordiogs. We've put new peo-ple with Bird's solos - Barry Harris, Ron Carter, Monty Alexander, Ray Brown and Jon Faddis, for example. Some of the younger guys were thrilled to play with Bird for the first time, even posthumously. But all the Charlie Parker solos will be original Bird, and better quality than you've ever

WEEKEND

A Genteel Playwright Takes On a Venal World

by Mei Gussow

ONDON — In Caryl Churchill's vitri-olic comedy, "Serious Money," greed, corruption and self-interest share equal billing. Venality is a way of LIFFE (an acronym for the London International Financial Futures Exchange). Money is the key to more money - and to power - and on this boardroom battlefield even sex takes a holiday. In one of the play's more absurd scenes, a banker and a businesswoman try to arrange a tryst and find they do not even have time for a quick lunch date in their tightly scheduled, yupwardly mobile lives. So they forget sex and return to the stimulation of profit-making in the City.

The play, which begins with a scene bor-rowed from 'The Volunteers, or the Stock Jobbers," a 1692 romp by Thomas Shadwell, is a kind of neo-Restoration comedy of ill manners and strangulated morality. For the-atergoers it offers a crash course in Euroeconomics. In London, "Serious Money has tapped a responsive chord with both the playwright's traditional admirers and those whom she is subjecting to ridicule. Whether "Serious Money" will repeat its

London success when it opens Dec. 3 at the Public Theater is a matter of conjecture. The very Englishness of the play may act against it, as may the stock market specificity of the locale, characters and jargon. One thing is certain: With the crisis on Wall Street, the play could not be timelier.

Serious Money" ends with the re-election of Prime Minister Margaret Thatcher and the cynical prediction, in song, of "five more glorious years." After Black Monday on Wall Street, the author changed only one line; there is now a reference to prices falling "in the crash."

In America, the interest in Churchill has been whetted by her last three plays to arrive here — "Cloud Nine," "Top Girls" and "Fen." The three plays are widely divergent. in "Cloud Nine" (1981) Churchill mocks the cuckoo land of English colonialism at the same time that she explores the bizarre byways of sexual role-playing. "Top Girls" (1982) describes the hollowness of the modern career woman who, in her climb, emulates the men who have repressed her. "Fen" (1983) is an embittered slice of life depicting the desperation and suppressed passions of women forced to become slaves to the land and to the men in their lives.

HAT they have in common is a Wfierce sense of fair play, a fervid social consciousness that caters to no special interest. Though socialism and feminism are of primary concern to the author, she is neither a polemicist nor a proselytizer. In fact, one of the ironies of "Top Girls" is that noue of the heroines is really heroic, least of all the career woman at the center. In her plays, Churchill is striking at deeper issues, such as the corruptive power of ownership and a collective view of history that breaks through barriers of time, class and gender.

Churchill, 49, has been writing plays for almost 30 years, But, beginning with "Cloud Nine," she has been consolidating her posi-tion as one of the most original and daring of contemporary playwrights. Her work offers a defiant answer to anyone who thinks that women writers can be pigeonholed. Chur-chill is as strong-willed and as earthy as any of her male colleagues and more willing than

Carvl Churchill with her latest play.

many of them to challenge theatrical tradi-tion. This, combined with her dazzling sense of theatricality, has moved her into the front

ranks of her profession. "She's a dramatist whose moment has come," says Max Stafford-Clark, artistic director of the Royal Court Theatre in Lon-don. He directed "Top Girls" and "Serious Money" in America and England in an exchange program between the Royal Court and the Public Theater. "Caryl is coming to terms with Thatcher's effect on women, on people who make money and on the poor. She's constantly exploring and commenting ou events as they happen.

Just as her work has its contradictions, Churchill is herself a paradox. Her plays are outrageous, even scandalous and the lansuage, as in "Serious Money," can be scabrous. The playwright, however, is no wildeyed weird sister, hut a genteel woman with a kind of regal reserve. The British director William Gaskill thinks she has a "classic English beauty" -- with her graying hair and high checkbones. Married to a lawyer and the mother of three sons (they are 24, 22 and 17), she has a close circle of friends. Outside

of that circle, she is aggressively shy. One Saturday afternoon last summer, when she and I were having tea in a West End cafe, she gradually became somewhat revealing. She said that, in her work, she was interested in "power, powerlessness and exploitation; people's longings, obsessions and dreams." I asked her what her obsessions were. After a long pause, she said in a muf-fled voice: "I don't feel consumed with them," hut admitted to having "passionate days." That day, for example, before we met, she had spent hours playing a single Bach fugue over and over on the piano, trying to alyze and understand its structure.

With that story tantalizingly in the air, she suddenly announced that it was 5 o'clock and she had to leave in order to look in on "Serious Money" at the late afternoon matince. Wanting to prolong the talk, I suggested that I might accompany her and watch the show with her from backstage. She was hor-

Churchill, she says she has no proof of such a relationship. Had Sir Winston met his namesake, he might have pigeonholed her, along with Russia, as "a riddle wrapped in a mystery inside an enigma." Churchill expressed her interest in theater very early. By the time she was 4, she was making up pantomimes and staging them for the amusement of her parents. She grew up in Montreal, returning to London in the late 1950s in order to study English at Oxford

rified at the idea. "I wouldn't take the re-

sponsibility for bringing someone back-stage," she said, and then added politely but

firmly that she had really talked enough. Momentarily sympathizing with the prob-lems of the interviewer, she said, "I know

you want the whole iceberg, not just the tip of it," and suggested, "You could make this

article about my dislike of interviews." Then she made a wish. "I want to be either Homer

or Anon., one of those people no one says anything about." With the barest glimmer of a smile, Anon. rushed off to her hit show.

In her case, withdrawal comes with the

territory. The more people want, the less she

is prepared to surrender. Earlier in her ca-

reer, she did sit for questioning, even, on

occasion, permitting outsiders to penetrate ber home — now as then in the middle-class Islington section of London. Those visits

ceased after one reporter was rash enough to

mention that there were dirty dishes in her

sink. "I don't like having deductions about

my life and character drawn from my

house," she explains. "It's bad enough hav-

a thesis will come to me and say, 'Did you

know there are babies in all your plays? or The plays have an obsession with time." Her response: "Oh, yes, well, indeed." She adds as proof of her unpredictability,

"There's no baby in "Serious Money." (In point of fact, there are babies in most of her

plays - and the works are obsessed with

Although Churchill thrives in a collabora-

tive form of theater, she is, in other respects, a loner. One close friend provides a clue to

ber behavior: "She's gone through enormous emotional upheaval, out of which the writing

comes. I think she tends to get deeply de-

pressed when she's not working. Her life

would be enormously stunted without the

theater." In her, there would appear to be a

dichotomy between family obligations and a

time.)

ORE and more she has to field

requests from academics analyzing

her body of work. "Students doing

ing them drawn from my work."

University, where her plays were given stu-dent productions. Just out of university, she married David Harter, a promising young lawyer. While keeping house and bringing up the children, she continued to write plays, writing out of whatever domestic calm she could find.

Nine. In criticism, one might say that her work is overly intellectual, that it suppresses

her emotions and conceals her own point of

This sense of propriety, of conforming to expectations, apparently took root early in her childhood. She is the only child of Rob-

ert Churchill, who for many years was a cartoonist for the London Daily Mail and other publications. Her mother was formerly

a fashion model. Though the playwright has frequently been quoted as saying she was "infinitely, distantly" related to Sir Winston

For many years, her creative time was determined by the children's school hours. Necessarily, the plays were short. Later, she characterized this work as "depressed plays about depression."

Clarifying that quote, she says, "I was fed up with the situation I found myself in in the 1960s. I didn't like being a barrister's wife and going out to dinner with other professional people and dealing with middle-class life. It seemed claustrophobic. Having started off with undefined idealistic assumptions about the kind of life we could lead, we had drifted into something quite conventional and middle class and boring. By the mid-

60s, f had this gloomy feeling that when the revolution came I would be swept away." At the same time, ber husband had be-come dissatisfied with his role as a harrister. He began giving free legal advice in a local legal center. Together they chose a life of genteel poverty and of limited professional aspiration, all of which seemed appropriate to their sense of social responsibility. She began doing research on bad housing condi-tions, and from that evolved "Owners" in 1972, her first full-length play to be done in London. At its center was an acquisitive landlady, a strong woman as anti-heroine, foreshadowing similar characters in "Top Girls" and other works.

"Owners" was followed by several productions created within an ensemble -18 . the Joint Stock company and the Monstrous Regiment, a women's theater group - a giant step away from writing short plays at her kitchen table. The Joint Stock method brought the actors, directors and playwright together in a collaborative process. A specifie subject would be chosen and, over a period of several weeks, the participants would do field research, bringing their findings back into the workshop. Then the playwright would go off and spend several months writing a play. Though at first she was self-conscious

about such public affiliation, Churchill soon found berself highly stimulated The first of her plays to emerge from this process was the

desire for adventure. To a great extent, she finds that adventure in ber work, which as much as anything transports her to Cloud Nine. In criticism, one might say that her work is overly intellectual that it purposes applied to British colonialism. The result, "Cloud Nine," later directed in the United States by Tommy Tune, represented a breakthrough for her.

The playwright has repeatedly returned to the collaborative method, although she also continued to write plays without benefit of ensemble research. One such play. "Top Girls," came out of her own desire to write about women at work. "I thought of calling the play 'Heroines," she says, "but I was afraid that one wouldn't see the irony of the otle. Perhaps people don't see the irony of calling it 'Top Girls.'

With "Fen," she was once more at work with Joint Stock, on location interviewing farm workers in the marshy fen country north of London. Though "Fen" and "Serious Money" are totally divergent in setting, style and content, each began as a socio-anthropological study of a way of life, of a tribe that was totally alien to the author before she began the project.

"Serious Money" started with Max Stafford-Clark, who thought that, as a change of pace, the Royal Court should "do a play about rich people instead of one about poor people." Eight actors, the director and Chur-chill, all of them novices in the financial world, plunged into the business of the city. But she was immediately captivated by the energy on the Royal Exchange, and was soon relating the adrenalin of trading to the adrenalin of performance. The timing of the project was fortuitous. A mouth after work egan, the so-called Big Bang arrived and the stock market was deregulated. Scandals broke out, including the Guinness affair, in which the beer company, in a takeover maneuver, sought to manipulate the value of its stock. Such events furnished the play with intrigue as well as immediacy.

"Cloud Nine" brought the playwright her first steady income; "Serious Money" may hring Churchill her first serious money. If so, indications are that it will not substantially alter her way of life. The relative lateness of her arrival made her feel that she was 10 years behind her playwriting contemporaries (such as David Hare and Howard Brenton), hut it did not arouse her competitiveness. She has always gone her own way as an artist, even as her work entered the mainstream.

She admits, however, to periods of doubt and discouragement. "I have long spells when I wonder why I am in the theater ---that's when I'm not writing a play. I also have occasional spells when I think I'd rather write other things — when I see bad produc-tions of my plays. Equally, the attraction of theater is that plays are not the same every time. They can be done differently by different people and that makes it more exciting, The reason for being in the theater is the pleasure of the medium itself. A painter likes paint; I like working with actors."

Initially she was drawn to theater by the idea of its "density and compression," and she has had no reason to change that percepdon. "I thought of plays as poetry and novels as prose," she says. "I thought Sophocles and Shakespeare were better than Dickens and Jane Austen. It was the greater thing to do; it was more exciting. That's why I did it, and probably why I still do it."

Nichaus played alto saxophone with Su Kenton and taught Whitaker how to fake it visually. He has known Eastwood since any days in Fort Ord, California. "Clint was the bartender and bouncer in a non-commissioned officers club where I played. He's the a pretty fair piano player. We talked about jazz all the time."

Red Rodney, who plays himself on th soundtrack and was also a consultant, say that Eastwood once told him on the set the "'I can't believe I'm in the same room with all you guys.' Imagine — a big star saying that. He's made it clear to everyone that is wants authenticity, be doesn't want another with the same set of the s wants authenticity, be doesn't want another 'Billie Holiday Story' fiasco. At the begn-ning I saw that certain things were not new and finally I got up the nerve to tell Cing about them. The script had us looking like junkies with horns and tails. But we didn't want to be junkies. At the beginning, sure, we may have thought it was the hip thing to da hut after a very short while it became a 24 karat borror. Then the dialogue had us at cursing. Bird was a courtly man, he never cursed. Clint took notes and made changes"

"I saw how the Warner Brothers erectives were with Clint," Rodney went on "He's made them hundreds of million of dollars and if he says jump, they're going to ask how high. Clint Eastwood making his film gives jazz currency. He's putting his money as well as his name in it. People are going to say, well, if he likes it, it must have something.

"Years ago jazz was used in films to repro-sent some sort of negative energy," Eastwood says. "But I hear happy energy coming from Bird. Of course it's not really a film with what you could call a happy ending, but he's been a big influence on me ow since I first heard him when I was 15 in Oakland.

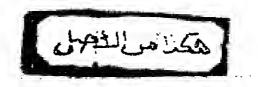

"Somebody like Duke Ellington had as much impact but somehow the mystique grew around Bird. Like with Bix [Beiderbecke], maybe dying young had something to do with it. Bird was a genius who couldn't quite adjust to normal society. He was a dramatic major figure but never capitalized on it. Ellington took his talent to fruition, he became a leader and it was his sound and only he could make it. Bird just let everybody else imitate him. He could not seen to bring all his brilliance together. He burned out. The mystique lingers today. Bird was a one-of-a-kind guy."

Bricklayers from the company work on the Gothic gatehouse at the castle in Pultusk.

Poland's Restoration Team

by John Tagliabue

ARSAW - Bricklayers clambering over spare wooden scaffolds were setting large Gothic-style brick. Nearby, dusly outside Poland. plasterers worked on graceful cornices in the

antechamber of a chapel where only weeks earlier magnificent frescoes of four slightly plump, rather stern ladies had emerged. Their restorers concluded they must have been allegorical representations of some of the cardinal virtues. The restoration project in progress was the castle in Pultusk, an oval, sland town on the Narew River north of Varsaw.

The workers were from Pracownie Konserwacji Zabytkow, a state-run company based in Warsaw that hoped its considerable skills resurrecting great works of Polish art and architecture from wartime damage. The company then mastered the art of exporting those skills, illustrating the thesis of its associate director of research; Lech Krzyzanowski, that "people understood there was a possibility to re-create life, to wring a victory over death, in symbolic terms." Poland is still in the tedious process of healing the scars of war inflicted on its architectural and artistic heritage, much of which was burned, ravaged and reduced to rubble between 1939 and 1945. The company, which began its work in 1946, is currently involved in about 400 restoration projects, in Poland and as far away as Cambodia. Some of the structures are restored to their original state: nthers are adapted for modern use.

gans in Krakow and tapestry workshops in Lodz and Warsaw. The company, whose Polish name translates as Ateliers for the Conservation of Cultural Properties, employs about 9,500 people, 1,100 of them

NDEED the company, which --- unusual for a state-run company - is self-financed, can only continue its work in Poland because of its projects abroad. At the moment, 400 workers are dispersed among 10 sites in Riga, the capital of the Latvian Soviet Socialist Republic, restoring wall paintings and rebuilding organs. But the main project there is the transformation of the Baroque church and medieval buildings surrounding the Marstall stables into a modern recording and video production center, including a recording studio in the church building itself.

For the last 10 years, company experts have labored in Augustusburg Palace, near Cologne, West Germany, restoring the magnificent Rococo summer residence of the archbishops of Cologne that the Bonn goverament uses for state receptions. Company archaeologists are also working

of people prepared designs for the faithful reconstruction of the old city after its de-struction by the Germans in World War II, which Poland's postwar leaders resolved should be completely rebuilt, phoenix-like. The crown of that work was the completion in 1984 of the former royal castle after 15 years of work. The company's principal activity is now restoration rather than reconstruction. Acute demand for specialists not only in an history and architecture but alsoin such disappearing crafts as stucco, gilding and woodwork has led the company to recrinit young people from schools and univer-

sities and meticulously train them in twoyear programs. Work overseas, and the promise of salary and adventure, binds them to the company and the country at a time when Poland's stumbling economy provokes

many young people to emigrate. Fur the restorers, Krzyzanowski said, "there is an ideological motive, and there is the money. They believe they are working for Polish culture, and not just building the shapes of houses with endless identical patterns and no individuality. They are pursuman." OME contracts are political, as was the Case when the Polish government pledged assistance to the Communist regimes in Phnom Penh or Hanoi. Then, the lure is not money but adventure, Krzyzanowski explained. In Cambodia we have been restoring wall paintings in the pagoda of Phnom Penh for three years," he said. "The income is close to none, but this is high adventure for a young Polish restorer from Krakow." Even as the monuments are restored, however, they face a new, more insidious threat: pollutants in the environment. "When we restored the Old Town of Warsaw and opened it in 1953, it was only 20 years before the quality of the roots, of the water pipes, of the stone, was so poor that further restoration was necessary." Krzyzanowski said. "Salts are forming in the cement, in the chalk, even in the pieces of stone from the quarry. "Vitruvius writes that you should leave freshly quaried stones in open spaces, to let them breathe, before using them in construc-tion," he went on, referring to the ancient Roman architect. "But today that means that poisons enter the stone, and you are building into your structures stones that are not nf good quality. "We do not realize the scale of the trouble," he said.

Assessing Feltsman as Pianist

by Donal Henahan

EW YORK - What if, before Alexander Solzhenitsyn arrived in this country in 1976, all we knew of his work was one chapter of "The Gulag Archipelago." Imagine the curi-osity, the aura of mystery, the poljucal speculation, the cultural glamour that would have surrounded the publication on these shores of the entire, all but legendary, book.

That improbable scenario is not quite a parallel to Viadimir Felusman's recent debut recital al Carnegie Hall, but resemblances may be discerned. After winning a couple of international competitions as a teen-ager, the Soviet planist began what promised to be major career, nnly to have it cut short in 979 when he applied for an emigration visa. The Soviets declared him, in effect, a nonplanist and banned his recordings. One tan-talizing record of Chopin Preludes did slip through, but that, fullowing the law of scar-city and value, simply aroused more public

And so, after much diplimatic wire-pull-ing and privately financed pressure by the producer Norman Gladney and Jewish emigre groups, the 35-year-old pianist was set free in August and came to settle in the United States. Last September he played at the White House, an acknowledgment of his extramusical significance, and in due time he found his way to Carnegie Hall, where he proved almost good enough to justify the publicity firestorm that preceded him.

HOUGH in the hierarchy of Sovietreared pianists Feltsman may not

measure up to Sviatoslav Richter or Emil Gilels and cannot really profit from such comparisons, attainment of the next rung down does appear quite possible. There is some irony in the realization that Felts-man may be a more sophisticated musician than either of those titans were at the time of their American debuts. The 1950s vintage of Soviet musicians, having been isolated dur-ing decades of war and Cold War, tended to be more innocent of modern scholarship and doggedly unadventurous in choosing repertory. Rather than trying to equate Felisman with such icons, we should measure him against a later generation of Soviet virtuosos. He might turn out to be this decade's Vladimir Ashkenazy. Even that level, of course, is one nut many planists can think about, let done reach.

It helps to remember that Feltsman is only the most recent of a long succession of Soviet artists to excite the Western public by being withheld from view in one way or another. For all the interest his arrival here has engendered, it cannot match the hungry anticipa-tion with which the musical public awaited the American debuts of Richter, Gilels, David Oistrakh and Leonid Kogan after World War II. In subsequent years, Rudolf Nureyev, Mikhail Baryshniknov, Mstislav Rostropovich, Ashkenazy and other leading Soviet artists either jumped ship or simply drifted away in search of a freer climate and did not return

All displaced persons, for various reasons,

Page 9

At Carnegie Hall.

took their place in a robust tradition that extends back at least to the Russian Revolution and its aftermath, when artists by the thousands left for the West, including some with names such as Rachmaninoff, Balan-chine, Stravinsky and Horowitz. No culture can afford to be so persistently generous in training and then giving away talent without risking eventual artistic anemia. The Soviet Union is not proving otherwise. The United States and to some extent other Western countries have been more than happy to accept these transfusions of talent, one such being Vladimir Feltsman, at the moment a resident of New Paltz, New York,

N recent years, Soviet policies in respect to Jewish emigration have swung errati-cally, but a steady flow of musicians to the West has somehow gone on. Although hardly to be compared to the stir caused by Feltsman's eight-year period in coventry and his dramatic release, periodie arrival of dis-placed musicians has kept the tradition alive. Some, such as the pianist Bella Davidovich or the conductor Seymon Bychkov, quickly carve out prominent places for themselves in America's concert life. Others enjoy a few heady moments of emigré celebrity, play the requisite debut program in New York, tour the community and college circuit for a sea-

midable technician. We recognize him as a colorist who can also achieve limpid clarity - that is, one who can get over the keys nimbly, even brilliantly, without sacrificing all beauty of tone. He is not afraid to bring both Biedermeier sentiment and sharply contrasting Chopinesque bravura to a Schubert sonata. And what else? We will find out in good time, when the gloss of political celebrity has worn off somewhat and the purely musical career has had time to flower our midst.

on 15th-century B.C. monuments of Hatshepsul near Luxor, Egypt, and on the remains of a ninth-century city in the deserts of Algeria. In the Cambodian capital of Phnom Penh, company experts are restoring immense wall paintings in the central pagoda. Others are repairing medieval temples

near Da Nang, in Vietnam. We began going overseas in the 1960s, for our Ministry of Foreign Affairs, restoring Polish embassics in Paris and London and New York," Krzyzanowski, an art histo-rian, explained, But the first significant non-Polish contracts came from Munich, when the city was preparing to host the 1972 Olympic Games.

AST Germany soon followed as a client, and 100 restorers worked from 1979 to 1986 virtually reconstructing Ł the Neue Kammern, graceful l8th-century palaces built in Potsdam's San Souci Park for Frederick II of Prussia. The work involved restoration of the foundations and vaulted cellars, redoing decorative Rococo stucco and restoring hundreds of paneled paintings, fireplaces and pieces of period furniture.

Next came other major West German pro-jects. In Brühl the sumptuous rococo stair-case of Balthasar Neumann was restored, and in Trier the company's experts worked on 16th- and 17th-century altars.

The company started out in the ruins and rubble of postwar Warsaw, where a handful

ishing up. Michael Smartt's high baritone was impressive, although his Porgy seemed a tad sophisticated. Henriena Davis's volatile Bess, Ivan Thomas's burly and burly-voiced Crown, and Patricia Miller's Serona (all alternating in the roles with other singers) were fine, as were Larry Marshall's virtuoso Sportin' Life and a trio of virtuoso turns from the Strawberry Woman, Peter the Honey Man and the Crab Man (Denise Woods, Mervin Wallace, Cornelius White). But this show was never moving when it should have been, and there is probably not much point in holding the perfunctory playing against the occu-pants of the pit, which was occunied, so help me, by the Polish Radio-Television Symphony.

NE might think that Bellini and his "Norma" unambiguously belong in the mainstream of the early 19th-century Italian Romantic-bel canto tradiwell. Breaking the three acts into bon, but that would mean not to two makes for a long sit before the reckon with the contemporary Ital-

intermission, making the occasion-al longueur more noticeable. Not everybody has yet been con-vinced about "Porgy's" viability as an opera, even though it has been consecrated in some real operation termines. Those who saw the Metrotemples. house practice. Even in standard terms, and despite the presence of excellent singers, this was a "Nor-ma" that lacked the musical-dramatic fire to get it off the ground. Pier Luigi Pizzi's sets, with a sacred tree as a symbolic centerpiece and abstract sliding panels to achieve scene changes, were perfunctory, as was his movement of the singers. The Bulgarian soprano Ghena Dimitrova (stepping in for an in-disposed Rosaind Plowright) has one of the most powerful voices to be found anywhere, particularly strong in the middle and short on top, and a bland temperament. It would be almost true to say that she had the temperament but not the vocal repose for Norma's opening scene, and the vocal strength but not the temperamental fire for the final scene. Martine Dupuy, the outstanding young French mezzo, distinguished herself as Adalgisa. as did Dimitri Kavrakos, the sonorous Oroveso, while Maurizio Fru-

Docklands – The Tide is still High

lthough a spate of new property developments is coming on stream in London's regenerated Docklands, there is no sign yet of a glut on the market. And there seems no end to the number of executives keen to live in a Thames-side apartment on the fringes of the City financial centres.

The recent fluctuations of the Stock Market seem to be acting not as a brake on home sales but, rather, as a stimulus, attracting investors from risky equity paper to the reassurance of tangible bricks and mortar. That is the view of one of the major developers in the area, Ideal Homes and its sister company, Trafalgar House Residential, based on their experience with their flagship project Tower Bridge Wharf.

ing, water ski-ing and windsurfing. The new Docklands' Light Railway station is three minutes' walk away and just a 12-minute ride to the City. A new project by Kentish

Property Group, creators of Watermint Quay and Cascades, is burrell's Wharf, where Brunel's Great Eastern was built over 100 years ago. Designed by award-winning architects Jestico & Whiles, Burrell's Wharf will comprise 12 buildings, both new and conversions of listed buildings, to create a unique Isle of ing dock, once bome of the Dogs development of 310 Cutty Sark and a host of the apartments, with shops, theper ships, Chippers Quey studios, business secondoria tion and extensive leisure superb marina-style scheme facilities. Sole agents Alan Selwith high quality houses, flats by & Partners is handling sales and maisonettes. All have with prices starting at delightful views over the open £111,000 for a studio. First water of the West India Docks apartments will be ready for

Water always lends magical appeal to property, and a sail upriver from Docklands reveals project after project that has enjoyed signal success. Beyond the pioneering Crown Reach is River Lodge, a unique development overhanging the river by Dolohin Square. Prices of the eight balconied units start at £525,000 but this has proved no deterrence to sales; Beauchamp Esmues has sold seven in a flash.

Next stop is the renowned Chelsea Harbour where sales by Savills and Hamptons & Sons - of the first £750,000 houses are proceeding, appropriately ar a rate of knots. Same goes for Thames Reach, which boasts super flats and five penthouses with doubleheight reception rooms with inne windows looking over the river to the playing fields of Barnes, Savills and John England & Partners are now selling the two remaining flats and a chowflat penthouse complete with contents at

Just a couple of hundred yards upstream by Hammersmith Bridge is Chancellors Wharf, the £10-million scheme designed by leading architects D.Y. Davies for Darcon Properties. Released this month through Marsh & Parsons, it consists of eight townhouses and 32 huxury flats due for completion next spring.

The five-storey houses with the four bedrooms and three bathrooms have dramatic brick-clad elevations, slightly nautical in appearance, with large porthole windows to the terrace rooms on the top floor. Each unit has a large private garage on the lower ground floor, balconies on the upper ground floors and first floors. and a roof garden facing southwest. Honor pictor tange from £325,000 to £350,000. Tworoom flats start at £128,000 while five-roomed units fetch from £260,000.

ASSET MANAGEMENT IN SWITZERLAND

Private banking clients have many different goals, but they all face one problem: how to protect and build their assets in an increasingly complex world. American Express Bank and its subsidiaries have a solution : asset management io Switzerland, a unique service combining traditional Swiss professionalism, prudence, and discretion.

Personal attention

As step one, our investment counselors will analyze your individual situation - including your financial goals and current investments - and advise you on the portfolio that best suits your needs. This may consist, for example, of short-term investments, equities, bonds, even precious metals, all carefully selected to give you an optimum balance of yield and security.

Our money managers then monitor your portfolio on a full-time basis, alert to any economic developments that may affect your investments. If you wish, we accept discretionary power to handle investmeot decisions on your behalf, in accordance with your personal goals. This is a practical, convenient arrangement, particularly if you reside outside of Switzerland.

Also, while our approach is Swiss, our outlook is global. Our network of 99 offices in 43 coun-

tries-one of the world's largest-gives us worldwide presence and access to extensive resources.

Finally, as part of the American Express family of companies, we can provide the discerning investor with a wide array of investment opportunities that few financial institutions can match,

Strictest confidence

If asset management in Switzerland makes sense to you, talk it over in strictest confidence with the professionals at American Express Bank (Switzerland) AG. Visit us soon, or telephone: In Zurich, Bahnhofstrasse 20, tel. 01/2196111; in Geneva, 7, rue du Mont-Blanc, tel. 022/32 65 80. Or contact yout nearest American Express Bank office for information.

American Express Bank Ltd. is a wholly-owned subsidiary of American Express Company, which has assets of more than US\$99 billion and shareholders' equity in excess of US\$5.7 billion.

Commerzbank and Dresdner **Report Sharp Profit Declines**

FRANKFURT - Dresdner Bank AG said Thursday that parent partial operating profit fell 15.6 percent to 639.3 million Deutsche marks (\$394 million) for the first 10 months of this year from a comparable period in 1986. Commerzbank AG said its profit on the same basis fell 14.1 percent to 565.6 million DM.

Dresdner blamed slow growth io interest and commission earnings, plus high costs, for the fall in partial operating profit, which excludes trading on its own account and extraordinary items. Commerzbank also cited rising operating costs, which it said outstripped a marginal rise in its lending earnings and a strong growth in commissions.

Dresdner said that interest and commission earnings grew only 1.6 percent to 3.21 billion DM, while operating expenses shot up 7.1 percent to 2.57 billion DM. It gave no figures for total parent operating gains, but Wolfgang Röller, the chairman, said they were "less favorable" than partial operating gains.

Commerzbank's earnings from interest and commissions grew 3.5 percent to 2.63 billion DM, while operating costs jumped 9.5 percent to 2.07 billion. Its chairman, Walter Seipp, said that total operating profit for both the parent company and the group fell more than partial operating income, but gave oo figures.

Cooperate on **Steel Output**

DUSSELDORF - Three major West German steel producers announced plans Thursday to cooperate on production in an attempt to cut costs in the face of what they 932.66 billion yen. called unfair foreign competition. The companies, Fned. Krupp GmbH, Thyssen AG and Mannesmann AG, said the effort would primarily involve plants in Duis-

burg in the lower Rhine region. Steel production io the area has suffered, they said, because of European Community subsidy policies, which distorted competition in the markets for steel and pipes. West German companies say

some of the subsidy problems are offset by a quota system that limits EC production. However, on Dec. 8, ministers are scheduled to discuss an EC Commission plan to

scrap the system for the most wide-ly made products, from July 1988. Krupp Stahl AG, Krupp's steel

unit, said it was considering closing a plant in the Duisburg suburb of Rheinhausen. Production would be shifted to Duisburg plaots of Mannesmann and Thyssen.

Krupp and Mannesmann would operate a Mannesmann plant in another suburb, Huckingen, Thyssen would take over the sectional steel and semifinished product out-

OSLO --- Jan Langangen, managing director of Norway's largest insurance company, has been named to head a new board at Statoil, the state-owned oil company. The announcement was made Thursday by Norway's oil minister. Ame Ocien.

The former board resigned on Oct. 20 because of a scandal involving cost overruns of 5.4 billion kroner (\$845 million) for a

refinery expansion project at Mongstad. Mr. Langangen, 37, managing director of Storebrand A/S, replaces Statoil's former board chairman, Inge Johansen.

The other new board members are Amfinn Holstad, the managing director of a wood and pulp firm; Else Fougner, an attorney; Arne Knapp, a union official; Harald Norvik, the head of an engineering concern, and Marit Reutz, a bank executive.

The new board members will oot have to give up their current jobs. The Statoil board's next monthly meeting is Dec. 15. Mr. Oeien said he expected the board to decide soon whether or not

to accept the resignation of Arve Johnsen, Statoil's longtime managing director.

where one 🐙 raising prices sky-high whenever chemicals went into short supply. it had no con stature no

Mr. Oreffice defended the practice "reinvestment pricing." Dis-->n.hdat6 gruntled customers referred to it as W code gouging. And when it came to deal--Paul See ing with the outside world, Dow's Pont Aler stance was somewhere between iso--CTER AS TSOIL BOLD lationism and cantankerousness. Through much of the 1970s, de-mand for the chemicals Dow made the room DEL WINNE outstripped supply, so Dow had oo Thankan economic incentive to change. And in any case, its executives did not want to. "Success breeds conserva-IS STORE PER ad. Post

tism, and that means a love affair with the status quo and an aversion to change," Mr. Popoff said. Dow's world changed in the early 1980s. The oil-rich nations started flooding the market with lowpriced petrochemicals. Suddenly Dow was selling into a glutted market, and its growth came to a halt. Sales hovered around \$11 billion from 1980 through 1986. Its profits seesawed between mediocre and re-

spectable -- last year, for instance, operating net was \$741 million but never soared. Mr. Oreffice responded by tearing Dow apart, and reassembling it. In the past eight years he has divested \$1.8 billion worth of busi-

nesses, including oil- and gas-relat-ed operations, a medical testing iness and Dow's share in e couple of joint ventures. The cash went to retiring debt - Dow's gross in-terest expenses this year will be \$200 million less than they were

five years ago — and making acqui-sitions in high-growth areas. Dow bought Richardson-Vicks Inc.'s Merrell drug division, which now forms the backbone of Merrell Dow Phase-contribute Inc. It

Dow Pharmaceuticals Inc. It bought Morton-Thiokol Inc.'s Texise unit, which gave Dow such wellknown household brands as Fantastik and Janitor in a Drum. And this year Dow went even further afield, buying Lamaur Inc., a company that makes shampoos and

other personal care items. Mr. Oreffice's goals were to globalize Dow's business enough so that the company could take advantage of, rather than be victimized by, currency fluctuations and country-to-country cost differen-

first slalom race of her career Thursday in the inaugural event of the 1987-88 World Cup of Alpine skiing. The 24-year-old, who has a repu-

right knee and doctors said she Friday with a men's slalom. A

ant slalom will complete races in Sestriere on Saturday and Sunday.

Indiana Loves **Knight Despite** Fernandez-Ochoa received a fin-ish line kiss from her father and

'Imperfections' The Associated Press

INDIANAPOLIS --- Coach Bob Knight received a standing ovation from Indiana University basketball supporters after saying be was wrong to pull his players off the floor in an exhi-

bition game against a Soviet team. Knight on Wednesday did

not mention a reprimand issued by the university earlier in the week, but said: "] made a mistake Saturday night, and no one can regret that mistake more than 1 do. 11 was a mistake in judgment."

"I would appreciate each of those of you who has oot made a mistake or two in the past 17 years to drop me a note in the morning.

"I am an imperfect man, as I would think most of you have certain imperfections," Knight said

But Knight's outpurst may cost him a chance at being a commentator on next year's Olympic basketball telecasts from Seoul, South Korea, Mike Weisman, executive producer at

NBC Sports, said. Weisman said he was "displeased, even a bil disgusted" by Knight's display, and said it. may "adversely impact" on the She said that Fernandez-Ochoa's coach's chances for the job.

OBSERVER Beggars and Breakfast

By Russell Baker N EW YORK — New York, New Ynrk. It's a city of beg-gars and limousines. Breakfast for two was \$29. "Orange juice, one egg over easy with bacon and toast" hrought a helpful hint from the waiter. "One egg will cost you just as much as two." A city of waiters. Was he a man from another world where people

the second s

from another world where people still budgeted for food and bent down to pick up coins spotted in gutters? Or did he think he was dealing with a contemptible pennypunching miser hungering for two eggs but too cheap to spring for them?

New York, New York. It's a city where you have to justify ynurself to waiters unless you have Power. That explains this macabre impulse to apologize to the waiter for ordering only one egg. If the impulse conquers, the waiter will bear a tale

to make his lip curl: "Well really, I shouldn't even have one egg, what with the latest scientific laboratorical research proving the cholesterol impact on coronary thrombosis, but being in this elegant hotel I thought maybe, just once, one little egg ---."

New York. It's a city of Power, and it is easy to tell the people who have Power from the people who have no Power hut are trying to fake it with rental limousines and \$29 breakfasts. The people who have Power never want to apolosize to waiters for eating only one

Nor do they care how much breakfast costs. It could be \$29, or \$290 (though oever \$2.90). They do it seemed, in the lee of a darkened not care, because they have Power, and the breakfasts they cat are not mere breakfasts, they are Power Breakfasts. New York has a saying about Power Breakfast. "If you have to ask how much Power Breakfast costs, you can't afford it," New York says.

it," New York says. It's a city of sayings. "Help me to get to the shelter" is the saying of the subway beggar, jabhing his pa-per cip. "Help me to get to San Diego" is the saying of the beggar at Lexington and 39th. Such a trip. All the way to San Diego. To help finance such a trip, a dollar hill is surely not too much.

Ah, New York, New York. It's a city that makes you feel ashamed of your cheap, \$1, decent impulses, It

makes your head hear passing pe-By Russell Baker TEW YORK — New York, New Ynrk. It's a city of beg-s and limousines. Breakfast for was \$29. "Orange juice, one over easy with bacon and the beggar a greenback. Makes you talk silently to yourself: "San Diego, hahl Guy's probably a pro-fessional panhandler making a for-tune nn this corner every day by explniting middle-class, liberal guit. What a fool, fool I be!"

It's a city where a dollar is important only when given to a beg-gar. Admission to the movie was \$14 for two. Seven dollars a seat. It was a beautiful movie, all in color, but spoken in French, so the audi-

ence had to read for two hours. New York, you city of miracles among the squalor. Where else would people pay \$7 to sit reading in the dark for two hours? And the

seats so cramped and hard. Seven dollars for a movie. Up from \$6 so soon after the market crash. Ah, mysterious economics. Seven dollars for a movie, yet not one dollar for San Diego?

identity.

chosen.

had lost.

New York. It's a city of icy winds pnuring down narrow chasms. Walkers that night, warmed by Provence memories glimpsed from \$7 seats, could admire the ingenuity with which outdoor sleepers outwitted the freeze.

For sleeping on the sidewalk, one man was wrapped in dense layers of plastic drop cloths and — shrewd fellow, knowing the danger of plastic over the head — wore a brown paper bag fitted snugly from tip of scalp to Adam's apple. For avoiding coacrete's chilling effect, another used the fetal position on a

wooden bench, impossible though

40-story tower. New York, New York. It's a city of towers. Hundreds and hundreds of towers. And more bundreds of towers still rising. They are Power Towers, though also file cabinets for bumans in the daytime, and also screens for keeping daylight out of the city.

In so many streets now darkness at ooon has become the destiny of the file-cabinet people lacking the Power to command offices above the 40th floor.

New York, you city nf lights, you become a city of daylong night where \$29 breakfasters are shamed for offering beggars San Diego. New York Times Service

a tribute "tn the universality of the French language" — a matter By James M. Markham New York Times Service DARIS — Tahar Ben Jelloup that the French have recently had reason to douht, given the spread of English in the world. Even Le Pen managed a bit of back-hand-PARIS — Ianar Ben Jellonn approves of polygamy — with languages, not women, he bastens to add. "My wife is Arab," ex-plained the 43-year-old Moroc-can novelist, "and my mistress is French, and I maintain a relaed praise, saying he "didn't mind at all" if the Goncourt went to "a writer of the French language, tionship of betrayal with both of

although a foreigner." Over a non-sumptuous lunch at an Italian restaurant, the self-Yet, when it comes to writing assured Ben Jelloun recounted novels and poetry. Ben Jelloun has been more faithful to his mis-tress than his wife. Last week, his that, several hours after the French politicians, King Hassan II of Morocco conveyed his condedication won him France's gratulations, too. As a student most prestigious literary award, activist in Morocco, Ben Jelloun the Prix Goncourt, for his novel was once detained for his anti-"La Nuit sacrée" (The Sacred regime activities, but, since mak-Night), an exotic tale of an Arab woman raised as a boy hut finally ing his name in France, he has refrained from criticizing Hassan freed of the bondage of her false II --- "a remarkable man," as the novelist pnt it.

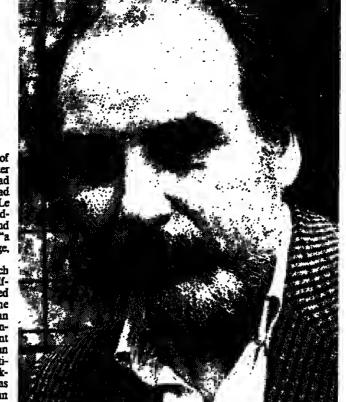

The award of the Goncourt The son of a Fez shopkeep prize to Ben Jelloun was a major Ben Jelloun studied in a local political as well as literary event school where courses were taught in France. Although six nonin French in the morning and in French novelists have won the Arabic in the afternoon. He came Goncourt since the prize was es-tablished in 1903, be was the first tion to become a filmmaker, but writer from one of France's forfound it a difficult métier to mer North African colonies to be . break into and so started to write

At a time when anti-Arab rac-"When I started to write it ism is a major political issue in came oormally to write io France, questions were inevitably French; it was not dramatic, no sense of guilt, no prohlems," said the novelist, a handsome man raised as to whether the prolific Ben Jelloun had been designated for his literary gifts - or because with a trim salt-and-pepper the 10 Goncourt jurors, who beard. "Most of the Moroccan intellectual class speaks French, and I feel freer when I write in picked him on the sixth ballot over a sumptuous luoch at Drouant restaurant, wanted to French.' deal a rebuff to Jean-Marie Le Several friendships hrought

male heir.

him in touch with the newspaper Peo's xenophobic National Le Monde, where be began by writing about the predicament of Front. One juror was impolitic enough to say that people would blame "the Le Pen effect" for Ben Arab immigrants in France -Jelloun's winning — just as they would have said the same if he nntably about the sexual loneliness of a community that was largely bachelor and male. In 1974, he attracted attention with Politicians in France fell over

each nther to congratulate him a front-page report of a pilgrim-and President François Mitter- age he made to Mecca, and folrand declared that the choice was lowed it with a oumber of opin-

"I tell stories and that's not too bad."

ion pieces on Middle Eastern affairs that were bitterly critical of Israel and supportive of the Deletition cause. Ben Jelloon is clearly buoyed by his success, and noted with pleasure that less than a dozen French novelists had recently His first best-selling book was seen their books sell as well as his. not a novel but an expansion of For a writer of fiction, he has a

his study of the sexual situation disarmingly uncomplicated ap-of immigrant workers that apof immigrant workers that ap-peared in 1977 under the title "La not too bad." The critical reception of "La Plus Haute des solitudes" (The Greatest of Solitudes), Ben Jel-Nuit sacree" has been warm, but loun continued to turn out novels the embrace has been more of and other tracts and in 1985 hit the jackpot with "L'Enfant de sa-book itself. Writing in Le Monde, ble" (The Sand Child), the story François Bott argued that the Moroccan novelist, paradoxicalof an Arab girl raised as a boy by a father determined to have a ly, was bringing a whiff of youth into French writing by reviving "L'Enfant de sable," which the ancient tradition of Arab

was published in the United storytelling. States this year by Harcourt Brace Jovanovich, sold 180,000 "With him, under the sign of Borges, the language of Racine and Balzac is put at the service of copies in France alone and has the Oriental story," wrote Bott. "It describes other costoms, it exbeen translated into 15 languages. Ben Jelloum said that "La "It describes other customs, it ex-Nuit sacrée" — the sequel to presses other thoughts. It is a cure "L'Enfant de sahle" — was that reinvigorates. It draws the "L'Enfant de sahle" — was forced out of him by enthusiastic readers who wanted to know the child's destiny when she grew up.

punk rocker said Geldof will leave Monday on an approximately eight-day tour to check the situa-tion in Ethiopia, where United Na-tions officials say five million peo-ple — a million of them children face starvation when food supplies run out in January. Geldof told The Times of London he hopes his visit next week "will focus attention on
